2017 AIA Nevada Design Awards Announcement of Recipients

The 2017 AIA Nevada Excellence In Design & Distinguished Service Awards Program is administered by the AIA Las Vegas Chapter. Award recipients will be recognized at the black-tie optional, AIA Las Vegas End of Year / Holiday Celebration and AIA Nevada Excellence In Design & Distinguished Service Awards Gala being held on Wednesday, December 13, 2017.

THE AIA NEVADA EXCELLENCE IN DESIGN AWARDS

Eligibility

The AIA Nevada Excellence in Design Awards program is open to all AIA Nevada members who are licensed in the state of Nevada for projects located anywhere in the world, and to AIA members from other states who are licensed in Nevada for projects located in Nevada.

AIA members are invited to submit projects of any size, budget, style or building type. New building projects and restorations are eligible as well as commercial, public works, hospitality or entertainment, interior architecture, residential or any project completed after January 1, 2013.

There is no limit to the number of projects that may be entered by a firm. The entry must have been designed by an architect who is a member of AIA. The submitting architect may be a member of a design team, whether or not serving as the head of the team. When one architect is not the sole author of a project, all other participants contributing substantially to the design of the project must be given credit as part of the submission, regardless of professional discipline.

Project authorship must remain concealed throughout the deliberations of the jury. If the authorship is revealed on any of the images, plans, or narrative included in the submittal PDF file the entry will be disqualified.

Projects that have received awards in previous AIA Nevada awards programs are not eligible -- with the exception of projects that have received recognition in previous Unbuilt Design Awards Programs, and have since become built structures and are completed.

Judging Criteria

Each entry is judged for the success with which the project has met its individual requirements. Entries are weighed individually -- not in competition with each other. Projects must exhibit design achievement that demonstrates exemplary skill and creativity in the resolution and integration of formal, functional, and technical requirements, including ecological stewardship and social responsibility. Projects should reflect a strong sense of place, of ecology, of history, or of purpose as an integral part of the demonstrated design excellence.
