Subject: Smart Gun Bill Returns as Legislative Session Ends

SMART GUN BILL RETURNS AS LEGISLATIVE SESSION ENDS

*The Following Is The Text of a Grassroots Alert
Issued By NRA-ILA Over The Weekend:*

On Thursday, January 7, the Assembly Appropriations Committee passed Senate Bill 3249 with a partisan 6-3 vote.

[As previously reported](#), S. 3249 /A. 4717, sponsored by state Senator Loretta Weinberg (D-37) and state Senator Richard Codey (D-27), would repeal the ban on traditional handguns from New Jersey's 2002 "smart gun" law. NRA testified against the bill because it replaces one bad mandate with another. NRA also asked lawmakers to repeal New Jersey's current "smart gun" law and amend the bill to remove the provision forcing gun dealers to offer these technologically unviable guns for sale. This misguided mandate would be similar to the government forcing your local auto dealer to offer new self-driving car technology for sale regardless of consumer demand or viability.

This effort to force the adoption and use of "smart guns" by mandating that firearms dealers stock them in inventory suggests that politicians will once again pursue a ban on traditional firearms in the future.

S. 3249 will be heard on the Assembly Floor Monday, January 11. **Please contact your [state Assemblyman or Assemblywoman](#) today and urge them to OPPOSE Senate Bill 3249.**
