BVH'S MATT WUNCH TO SPEAK AT AUTODESK

Bloomfield, Connecticut - BVH's BIM Manager Matt Wunch will be presenting at [Autodesk University](#) (AU), December 1-3, in Las Vegas, Nevada. The world's largest gathering of Autodesk software users, AU 2015 is attended by more than 10,000 design, engineering and manufacturing professionals. Matt's course will focus on InfraWorks 360 software and its ability to quickly create impressive schematic utility designs and presentations.

Matt has been with BVH for 14 years and is an expert in several design visualization software programs. He is an Autodesk Revit Architecture 2015 Certified Professional, one of only 2 to hold the certification in the State of Connecticut. "I'm thrilled to be speaking about this dynamic software to such a prestigious audience. InfraWorks 360 is one of the latest technologies changing the design and engineering industry, and it's an honor to be able to share this software's amazing capabilities with other Autodesk software users."

In the [course](#), Matt will demonstrate how to create a model using InfraWorks 360's software Model Builder and generate utility routings from external data. He will also offer tips on how to make impressive presentations, and quickly and easily create videos of schematic project designs.

About BVH Integrated Services

With offices in Connecticut and Massachusetts, BVH Integrated Services, P.C., is a multi-disciplined engineering firm providing civil, structural, mechanical, electrical, plumbing and fire protection engineering services, commissioning and technology design. Serving clients since 1958, BVH is a leader in green building design, with clients in the higher education, healthcare, research, K-12 schools, and municipal markets.
