Application is due on or before **March 3rd, 2017**

Applications will be accepted by mail, fax & email:
Endocrine Fellows Foundation
342 North Main St.
West Hartford, CT 06117
[info@endocrinefellows.org](mailto:info@endocrinefellows.org)
Office: 860.586.7574
Fax: (860) 586-7550

_The dates for the Preceptorship are final._
_If you cannot attend the entire period, please do not apply._
_Only 2nd and 3rd year fellows are eligible._
_No exceptions will be made._
Endocrine Fellows Foundation Preceptorship Program Description and Schedule

Accredited endocrinology training programs provide adequate exposure to all clinical areas. However, not all programs can provide in-depth exposure to specific areas such as metabolic bone diseases. The Endocrine Fellows Foundation and Columbia University are pleased to announce a preceptorial experience to meet this need. They will be awarded to fellows who desire a greater experience in metabolic bone diseases. Stipends will be provided for travel, hotel, and meals. A description follows of the preceptorship to be offered in Metabolic Bone Diseases at Columbia University, College of Physicians and Surgeons.

Metabolic Bone Diseases
Columbia University, College of Physicians and Surgeons
New York, New York

John P. Bilezikian, M.D.
Vice-Chair, International Education and Research
Chief Emeritus, Division of Endocrinology
April 24 – May 5, 2017

The Preceptorial in Metabolic Bone Diseases, sponsored by the Endocrine Fellows Foundation, is conducted at the Columbia University Medical Center, Division of Endocrinology. The faculty that will be conducting this Preceptorship in the Metabolic Bone Diseases Unit is comprised of Drs. John P. Bilezikian, Ethel S. Siris, Elizabeth Shane, Shonni J. Silverberg, Edward Guo, Mishaela Rubin, Aubrey Stoch, Allison Pack, Patricia Ducy, Stavroula Kousteni, Serge Cremer, Angela Carelli, Aline Costa, Tara Allmen, Tom Nickolas, Marcella Walker, Adi Cohen, Robert Lindsay, David Dempster, Felicia Cosman, Jeri Nieves, Ronald Staron, Donald McMahon, Stavroula Kousteni, Natalie Cusano, James Lee, Randy Yeh, and Michael Yin.

The faculty engages in a vigorous clinical research program as well as in an active practice. Their expertise extends also to more fundamental research initiatives in the mechanisms of calcitropic hormone action and bone cell biology. Diagnostic and therapeutic approaches used by the group are on the cutting edge of the field, and in many instances, have been defined by their efforts. These approaches include bone mass measurement techniques; application of calcitropic hormones and metabolic bone marker measurements to evaluation and therapy; bone biopsy with histomorphometric analysis (in collaboration with the Regional Bone Center of Helen Hayes Hospital, an affiliate of the Columbia University Medical Center), basic bone cell biology, transcriptional control of bone cell function and the most recent advances in the therapeutics of bone disorders. The Columbia Faculty at Helen Hayes Hospital includes Robert Lindsay, David Dempster, Felicia Cosman, and Jeri Nieves.

The fellows who are selected to participate in this program will gain experience in all these areas. The discipline of clinical investigation will be introduced also with individual tutorials on protocol design, acquisition, and interpretation of data, and statistical testing. Additionally, the preceptorial will consist of regular conferences replete with clinical case discussions, journal club, and research seminars. The preceptorial will also emphasize heavily the clinical approach to the patient with metabolic bone disease. The diagnostic and therapeutic approach to a wide variety of clinical problems will be reviewed case by case with the fellow. During the two-week training period, there will be many opportunities to have discussions with many members of the faculty.
Tentative Schedule for Preceptorial
(Times and Topics are Subject to Change)
April 24 – May 5, 2017

John P. Bilezikian, MD, Director
Professor of Medicine and Pharmacology
Vice Chair, International Education and Research
Chief Emeritus, Division of Endocrinology
Director, Metabolic Bone Diseases Program
Columbia University Medical Center
College of Physicians and Surgeons

April 24: (Day 1) 1. Welcome & Introduction to Metabolic Bone Diseases (Dr. Bilezikian); 2. - Clinical Pharmacokinetics & Pharmacodynamics of Bisphosphonates (Dr. Cremers).

May 1: (Day 6) 21. Bone Biology: Basic & Histomorphometric Concepts, Clinical Research & Epidemiology (Drs. David Dempster, Robert Lindsay, Felicia Cosman, and Jeri Nieves at Helen Hayes Hospital);

May 2: (Day 7) 22. Radiology of Metabolic Bone Diseases (Dr. Staron). 23. Osteoporosis II (Dr. Bilezikian); 24. Case Presentations (Dr. Cusano). 25. Antiseizure Medications and Bone (Dr. Pack).

May 3: (Day 8) 26. Osteoporosis in Premenopausal Women (Dr. Shane). 27. Racial & Ethnic Variation in Fracture Risk Insights from New Imaging Techniques (Dr. Walker); 28. Outreach Programs after the Fragility Fracture (Tayra Keshinover).

May 5: (Day 10) 35. Wrap up and Evaluation: Departures. (Preceptors and Dr. Bilezikian).
