

GSO FOUNDATION
GEORGIA SOCIETY OF OPHTHALMOLOGY

The GSO Foundation is a 501(c)(3) organization designed to promote projects that raise awareness of ocular disease and to fund programs which support underserved populations in Georgia and address unmet needs related to eye health and access to care.

Through the generous support of our members, individuals, and commercial entities, the GSO Foundation helps to fund projects like Camp Abilities, a sports camp for visually impaired and blind children. The GSO Foundation's other activities include:

Public awareness campaigns

Professional medical education grants

Continuing medical education scholarships for ophthalmic residents and fellows

Development or sponsorship of educational programs for allied health professionals

Support for organizations that provide direct assistance to disadvantaged patients with vision problems

Other projects that advocate or promote education, treatment, or innovations in ocular disease and conditions of the eye

All donations to the foundation are completely tax deductible. Donations can be personal, or made on behalf of your entire practice; they can even be completely anonymous. You can also commemorate a colleague or loved one by making a contribution in their name. All non-anonymous donors will be recognized on the GSO website.

Go to **www.ga-eyemds.org** to donate online or to suggest a program for the GSO Foundation to sponsor.
