## Terminology

<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cost Sharing</td>
<td>The costs a member is responsible for paying for health services when covered by health insurance.</td>
</tr>
<tr>
<td>Deductible</td>
<td>A form of cost sharing. A deductible is a dollar amount that is paid for initial medical costs before health insurance starts to pay. HIP 2.0 has a $2,500 deductible that is funded by a combination of state and member contributions.</td>
</tr>
<tr>
<td>Copayment</td>
<td>A form of cost sharing. Copayments or “copays” refer to a specific dollar amount that an individual will pay for a particular service, regardless of the total cost of the service accessed. The payment may be collected at the time of service or billed later. The HIP Basic plan requires copayments for most services from $4 for a doctor's visit or prescription to $75 for a hospital stay.</td>
</tr>
<tr>
<td>Federal Poverty Level (FPL)</td>
<td>Determined annually by the federal government. The federal poverty level for 2014 is $973 per month for an individual and $1,988 per month for a family of four. 75% of the federal poverty level is equal to .75 x the federal poverty level for the family size.</td>
</tr>
<tr>
<td>Affordable Care Act</td>
<td>Federal law passed in 2010, requires most individuals to have health insurance or face a tax penalty.</td>
</tr>
<tr>
<td>Federal Health Insurance Marketplace</td>
<td>Individuals with income over the federal poverty level can purchase insurance plans through the federal government’s Health Insurance Marketplace. Those with incomes between 100% and 400% FPL may receive federal tax subsidies to help pay for coverage.</td>
</tr>
<tr>
<td>Preventive Services</td>
<td>Health care services recommended to identify health conditions so they can be treated before they become serious.</td>
