OVERVIEW
This education program will explore complex documentation issues for psychiatric services, which if overlooked, can prompt internal and external audits, including those by Medicare and Medicaid. Learn how to document key indicators that support medical necessity and chronic care and individualize notes from group sessions. You will also get an update on ICD-10 specifications and guidelines for psychiatric services. Accurate clinical documentation is critical to responding to, but more importantly reducing exposure of, being audited. This session will explain how to minimize the risk of audits by hearing about lessons learned and also about how a structured compliance program can make navigating an audit easier.

Bonus information to be provided on ICD-10 CM specifications and guidelines for Psychiatric services.
