BUYER'S Guide

Connect with Companies that Understand Municipal Utility Needs
Compared to a standard three part couplings (one brass body, two brass nuts and two compression gasket assemblies), these couplings consist of two brass components, two compression gasket assemblies and one plastic spacer, which assembles with an average of one third the amount of rotations required for the standard three part couplings. This reduces the amount of time installers are required to be in the ditch and the amount of repositioning of the wrench while installing.

The Fast Connect Fitting is used where standard tube couplings are used but installers want a quicker installation. The Fast Connect Fitting also has the tighten-to-stop feature and can be used when coupling two pieces of copper or CTS PE pipe is required. This product is a good choice in the field because the amount of rotations required to complete a leak free joint is reduced by two thirds of a standard coupling, saving time which is also money. Even though the brass components in this design should never touch water, it is a No-Lead Brass product.

* Insert stiffeners are required when used with CTS PE.

Telescoping Curb Box

As a brand new product offered by A.Y. McDonald, the telescoping curb box is the first of its kind from A.Y. McDonald! This innovative curb box contains just as many features as other curb box models but stands out due to one word: adaptability. Below are just a few of the features and benefits that come with this new product:

- 1 1/4” upper section
- Adjusts a full 36”
- Constructed of non-corrosive materials, solving hot corrosive soil issues
- Lightweight composite material reduces shipping expenses/damages
- Greater extension range offers reduction of inventory without reduction in sales
- A repairable top section with repair parts available
- Comes with an optional stainless steel rod and interchangeable bases
- Converts easily from Minneapolis to Arch Base

Stainless Steel Saddles and Repair Clamps

Our Stainless Steel TECK™ service saddles feature a fully welded bar, chemically passivated welds, anti-gall nuts, NBR Pad O-Ring gasket, and AWWA & FNPT taps. Multiple sizes are available including standard and custom diameter ranges.

Our Stainless Steel TECK™ repair clamps feature a fully welded bar, chemically passivated welds, roll plate, anti-gall nuts, NBR taper grid pattern gasket, optional AWWA or FNPT outlets, and optional conductivity patch. Multiple lengths and sizes are available including standard, custom, and O.D. specific diameter ranges.
The Bolton & Menk Story

In 1949, two hard working Midwesterners – John Bolton and Martin Menk – saw people in their surrounding communities with dreams of a bright future, a desire to grow, and a common challenge of aging infrastructure. Their goal: to help communities make progress by listening to what people want, finding the best solutions for their needs, and treating them right. The legacy of John and Martin lives on. We still want to help, we work hard every day, and we always remember what got us here – we’re people helping people.

Bolton & Menk specializes in providing public infrastructure solutions. We want to take care of our clients by providing the best services and solutions for them. From advocating for our communities, to designing their dreams, to finding funding; we take pride in our work throughout the Upper Midwest. Because we live here too. We believe in the power of face-to-face meetings, friendly conversations, and a collaborative decision making process to keep your projects on schedule, within budget, and focused on real, workable solutions.

We promise every client two things: we’ll work hard for you and we’ll do a good job. We take a personal interest in the work being done around us. And at the end of the day, we’re Real People offering Real Solutions.

Bolton & Menk Specializes In:
- Civil & Municipal Engineering
- Water & Wastewater Engineering
- Transportation Planning & Engineering
- Aviation Services
- Water Resources Engineering
- Landscape Architecture
- Land Surveying
- Geographic Information Systems
- Project Funding & Financing

“I have found the staff at Bolton & Menk to be very responsive and professional in working with us to make the best plans and decisions for our City. The staff has a passion for what they do and wants that to show in the community that you live in. Through their leadership and cooperation, we have worked together to complete high quality projects that are delivered on time and within budget.”

Sven Peterson, MPA, City Administrator, City of Perry

THE FIRST STEP STARTS WITH FINLEY ENGINEERING

MOVE FORWARD WITH FINLEY

Finley engineers take pride in designing, engineering, and overseeing broadband and energy projects that serve the needs of customers in the 21st century.

You can rely on Finley’s decades of multidisciplinary experience in electrical power systems and broadband networks to create connections that provide infinite opportunities for your community.

As your partner, we understand how meaningful those connections can be and we are committed to making your project a success from initial development through launch.

QUESTIONS? WE HAVE ANSWERS.

As the oldest and largest electrical contractor in Eastern Iowa, you can have confidence we’ll get the job done right.

**ENGINEERING & INTEGRATION**
You can rely on our team to design, engineer, build and integrate complex power and control systems to make your operation run faster and more efficiently.

**DRONE SERVICES**
Leveraging commercial-grade unmanned aerial vehicle (UAV) technology without having to own and operate a UAV yourself has never been easier. Get data, expertise and solutions to make informed decisions.

**POWER TESTING**
We’ve got the testing equipment and the experience to ensure your power distribution system is running at maximum efficiency.

Find out how you can get **CONFIDENCE DELIVERED**® on your next project. Go to www.tricityelectric.com or call 563.322.7181.
The importance of maintaining your electric power generation equipment is common knowledge, but did you know proper maintenance of your electrical distribution equipment is just as crucial? Take the worry away with Advanced Electrical Services preventive maintenance by Ziegler Power Systems. Ziegler offers a complete package of electrical services:

- Maximize your power reliability and safety
- Minimize unplanned outages
- Extend the life of your equipment
- Prevent loss of productivity
- Meet OSHA and NFPA requirements

Ziegler maintains and services all makes and models of electric power distribution equipment.

- SWITCHGEAR MAINTENANCE AND TESTING
- AUTOMATIC TRANSFER SWITCH (ATS) MAINTENANCE AND TESTING
- TRANSFORMER MAINTENANCE AND TESTING
- BATTERY SYSTEM MAINTENANCE AND TESTING

24/7 EMERGENCY SERVICE AVAILABLE: 888.320.4292
