

As a new practitioner, graduating from the University of Maryland in 2013, I have found myself proudly and enthusiastically involved in MPhA. As Chairperson of the Meetings Committee for the last 2 years, I lead a wonderful group of pharmacists who brainstorm ideas for speakers, events, and themes for the mid-year and annual conferences. I am also fortunate, in that I have been able to attend Legislative Day in Annapolis for the last 6 years where I have had the opportunity to talk senators and representatives and help shape the issues that affect the profession of pharmacy.

Immediately after graduation, I completed a Community Pharmacy Residency with the University of Maryland. Since then, I have been working as a clinical pharmacist at independent pharmacies in western Maryland where I have been involved in some exciting opportunities. Most recently, I am the lead coordinator of a new transitions of care program working with Home Health Care and Frederick Memorial Hospital. I have also implemented several new vaccine programs, including travel vaccines, as well as raise money for several years to organize free flu vaccine clinics at the Frederick Rescue Mission and Union Rescue in Hagerstown.

I am passionate about pharmacy and am excited by the growing opportunities to expand the professional boundaries that we have as pharmacists while protecting and safeguarding the citizens of Maryland. I am also dedicated to continue advocating for members of MPhA to have a positive impact on our profession Thank you for your kind consideration.
