

FOAL VACCINATIONS
NEDA Fall Festival 2013
August 2, 2013

Foals under 6 months must be accompanied by a vaccination certificate of the dam. The dam must have been vaccinated for EIV within the final 6 months of pregnancy and for EHV at least 90 days before foaling.

Foals over 6 months must have had their initial dose of BOTH EIV and EHV 1/4, with the appropriate boosters:

EIV: 1st dose at 6 months, 2nd dose within 3-4 weeks post initial,
3rd dose at 10-12 months of age

EHV: 1st dose at 4-6 months, 2nd dose within 4-6 weeks post initial,
3rd dose at 10-12 months of age

Horses over 1 year: Must be vaccinated for EIV within 180 days and EHV-1/4 within 90 days of arrival at horse show.
