Efficient & Accountable Care
Coordinated Seamless Health Care System 2.0

- Patient/Person Centered
- Transparent Cost and Quality Performance
  - Results-oriented
  - Assures Access to Care
  - Improves Patient Experience
- Accountable provider networks designed around the patient, including LTC needs
- Shared Financial Risk
- HIT integrated
- Focus on care management and preventive care
  - Primary Care Medical Homes
  - Care management/prevention focused
  - Shared Decision-Making and Patient Self-Management

Community Integrated Health Care System 3.0

- Patient, Population, and Community-Centered
  - Community Health Resource Linked
  - Cost, Quality, and Population Health Outcome Transparency
  - Community Healthy Living Choices
- Community Health Integrated networks capable of addressing psychosocial, economic and LTC needs
- Right care, at right time, in right setting
- Population-based reimbursement
- Learning Organization: Capable of rapid deployment of Best Practices
- Community Health Integrated
  - Community Healthy Living Oriented
  - Community based support developer
  - Shared community health responsibility
- E-health and tele-health capable
  - Wide use of remote monitoring and tele-health and e-health management
  - Health E-Learning resources, social networking, health literacy tools
Health Reform Terminology

• CDC Four Domain Areas
  – Epidemiology/Surveillance
  – Environmental Approaches
  – Health System Interventions
  – Community-Clinical Linkages

• Triple AIM

• Person (Patient)-Centered Medical Homes

• Accountable Systems of Care

• Payment Reform

• Population Health

• State Model Innovation Design Grants
Welcome to the Primary Care and Public Health Web Page

Purpose
This web site exists to support the growing partnership between public health and primary care. Public health focuses on offering a broad array of services across communities and populations that, collectively, help people to be healthy. Primary care focuses on providing individuals with acute, preventive and/or chronic care for conditions and diseases. Together, public health and primary care share a goal of promoting the health and well-being of all people.

Order Form for Primary Care Resources

(Revised 02-06-15)
Use this form to order brochures, posters, flyers, business cards, and other Michigan Department of Health and Human Services resources for primary care providers. (Please Note: This form contains fillable fields to allow you to complete and send it electronically. If your Web browser does not support fillable forms, you must first save this PDF file, and then re-open it using Adobe Reader or Adobe Acrobat.)

Michigan Quality Improvement Consortium — Evidence-Based Guidelines for Providers
The Michigan Quality Improvement Consortium establishes and implements a core set of clinical practice guidelines and performance measures. Resources include standardized guidelines, performance goals, measurement methodology, and performance reporting endorsed by member plans and organizations.

Webinar Series for Primary Care Managers
A webinar series for primary care managers was developed in the fall of 2013 through a collaboration between the Michigan Department of Health and Human Services and the Michigan Primary Care Transformation Project. Visit our Webinar Archive for access to slides and full audio recordings of each presentation.
