### Gold Sponsors

Established in 1947, **Brown and Caldwell** is a nationally-recognized full-service environmental engineering consulting firm. Delivering success to a wide range of clients, from local to federal governments, as well as many Fortune 100 companies, we have been consistently ranked in the top 100 by *Engineering News-Record* and *Environment Today*, and are one of the few major environmental firms wholly owned by our employees. For more than 60 years, we have delivered innovative, simple, and economical solutions that are both highly effective and responsive to each client's needs. With more than 1,500 employees and 47 offices nationwide we are organized so that each local office can provide the firm's full range of services. Our growing Mid-Atlantic operation includes offices in Alexandria and Virginia Beach, VA and has a staff of over 100 employees covering all aspects of civil and environmental engineering.

As a key operating center in the **GHD** global network, the US staff provide a complete range of engineering and consulting services to municipal and private clients. Our success is the result of innovative design and management solutions combined with sensitivity to economic considerations.

CLIENTS | PEOPLE | PERFORMANCE

We have 300-plus professionals providing in-house capabilities in wastewater, water, civil (infrastructure), solid waste, environmental, structural, mechanical, electrical and sustainable engineering, as well as architecture, environmental sciences, hydrology, asset management, management consulting, and contract operations.

We also have available the resources of the 6,000-person GHD global network of professional engineers, architects, planners, scientists, drafters, project managers, economists, and supporting staff in our water, energy and resources, environment, property and buildings, and transportation market sectors.

**Old Dominion Electric Cooperative:** Headquartered in Richmond, Old Dominion Electric Cooperative is a generation-and transmission cooperative providing power to 12 electric distribution cooperatives, 10 in Virginia and one each in Maryland and Delaware. Old Dominion's member systems are demographically diverse and range from the sparkling blue Atlantic to the majestic Blue Ridge Mountains and from the

bustling suburbs of Washington, D.C. to the rolling, fertile farmland of Southside Virginia. One in ten Virginians receives energy from electric cooperatives, and co-ops serve about a third of the landmass in the three states, including much of the land with the best development potential in the area.

Since 1970, **SCS Engineers** has delivered economically and environmentally sound solutions for solid waste management and other environmental projects throughout the world. We assist the public and private sector plan, design, permit, construct, and operate their solid waste recycling, energy utilization, collection, and disposal.

The firm has ranked as the Number One Solid Waste engineering company five times by *Engineering News-Record (ENR)*. In addition, SCS Engineers has ranked as one of the fastest-growing architecture, engineering, and environmental consulting firms on the *Zweig Letter Hot Firms List* for the last six consecutive years. SCS provides engineering, construction, and long-term operations and maintenance services to private and public sector clients through a network of 47 offices in 23 states and worldwide. For more information about SCS Engineers, please visit our website at [www.scsengineers.com](http://www.scsengineers.com) or contact [service@scsengineers.com](mailto:service@scsengineers.com).

**Virginia Housing Development Authority:** VHDA strives to help Virginia localities create healthy and revitalized communities through our use of housing resources. We assist Virginians with low- to moderate-incomes buy their own homes. VHDA also helps finance affordable, quality rental housing, and we help people with disabilities and the elderly make their homes more livable. We teach and support free homeownership classes,

and partner with other lenders, developers and community service organizations to help put quality housing within the reach of every Virginian. And, we do it all without using a single taxpayer dollar.

**Virginia Resources Authority:** VRA provides innovative and cost-effective financial solutions to meet the infrastructure needs of communities. From water and sewer improvements to transportation and public safety projects, VRA is available to assist local governments and regional authorities with affordable financing for all their capital improvement needs.

Since its inception in 1984, VRA has provided over \$5 billion of financing for more than 950 infrastructure projects across Virginia.
