Documentation, Coding and Compliance Principles

Sat. April 16 8:00 am – 5:00 pm

Now that ICD-10 transition has occurred, we will take a look at all the important principles for diagnosis and CPT coding as they are applied to the carrier policies for 2016. We will examine coding and documentation policies, including Medicare, and how your documentation and coding procedures have to adapt. Dr. Fucinari will show you step-by-step procedures to manage your risk by implementing the new policies and procedures into your office.

Dr. Mario Fucinari is uniquely qualified as one of the few instructors still in full-time practice. He is a Certified Insurance Consultant, Certified Medical Compliance Specialist and a Certified Professional Compliance Officer. He also serves on the Carrier Advisory Committee for Medicare. Dr. Fucinari will present the updated material in a manner that is easy to grasp for both the doctor and staff. This course is designed for doctors, staff and billing personnel. You will take away procedures and knowledge that can be applied to your patients on Monday morning!

Dr. Mario Fucinari has been presenting Continuing Education classes for over twenty years and is a nationwide speaker on Medicare, Clinical Documentation, ICD-10 Coding, Compliance, and HIPAA. This class is sponsored by NCMIC. As a participant, all NCMIC policyholders will be eligible to receive a 5% discount off your premiums for the next three years. In his back-to-the basics approach, Mario whittles down a difficult subject to an understandable and interesting comprehension of the requirements.

Advanced CT

Sat. April 16 9:00 am – 4:00 pm

Are you a licensed CT with some experience under your belt? This course is designed for the CT who is already working in a practice. This course will feature a look at the various stages of healing and how using therapeutic modalities impact the healing process of your patient’s. We will review preliminary physical exams, electrotherapy, therapeutic ultrasound, thermotherapy and cryotherapy within this 6 hour course.

This course meets the 6 hours of credit needed to renew as a CT.

Brenda Holland, DC, DICCP

Dr. Holland is a graduate of Palmer College of Chiropractic in Davenport, IA. Since graduation, she has served on chiropractic and community boards and committees. Dr. Holland has been actively teaching courses including anatomy, x-ray positioning, nutrition and therapy modalities. She has an advanced degree in pediatrics and pregnancy and is currently in active practice in Germantown.

Motion Preservation and a Collaborative Approach to Care

Sat. April 16 8:00 am – 12:00 pm

With over 100 years of combined experience and expertise, Dr. Andrew Beykovsky, Dr. Christopher King and Dr. Lynn Bartl will be presenting the most up-to-date information on the leading-edge motion preserving techniques they are using to help their patients with chronic back pain.

This program is designed to inform, educate and strengthen collaboration between neurosurgeons and chiropractors in order to provide the most cohesive and supportive care available to all patients. Through this collaboration, patients statewide will receive the highest level of care available, and have the greatest opportunity for the best possible outcome.

Andrew Beykovsky, MD

Dr. Beykovsky has an ongoing commitment to incorporating the latest neurosurgical techniques into his clinical practice, allowing for superb care in a compassionate and timely manner. His philosophy is to educate his patients and participate in their care and decision-making for the best possible outcomes. His medical interests include minimally invasive spinal surgery, complex spinal surgery, brain and spinal trauma, brain tumors and functional neurosurgery; including epilepsy and movement disorders as well as computer assisted stereotactic neurosurgery.

Lynn Bartl, MD

Dr. Bartl is a board-certified neurosurgeon. Her goal is to provide state-of-the-art neurosurgical care in a caring environment. She offers surgical and nonsurgical treatments of the spine, including minimally invasive techniques and artificial disc replacement. Dr. Bartl also treats patients with brain tumors, aneurysms, head injuries, trigeminal neuralgia and hemorrhagic stroke. CyberKnife radiosurgery, image-guided surgery and endoscopic surgery are just a few of the advanced technologies she uses.

Christopher King, DO

Dr. King is a board certified neurosurgeon. He brings a holistic approach to his diagnostic skills and his care for patients. He prides himself on his efforts to educate patients so that they make better-informed decisions. Dr. King has extensive experience in complex spinal reconstruction and minimally invasive procedures as well as a broad scope of advanced cranial, peripheral nerve and state-of-the-art radiosurgical procedures.

Wisconsin Worker’s Compensation: The Basics and Beyond

Sat. April 16 1:00 pm – 5:00 pm

Chiropractors in Wisconsin are full participants in our state’s Workers Compensation system, acknowledged to be one of the best in the U.S. However, it is a proprietary system, and has little known rules and conventions that must be navigated. In this course, you will learn: referral protocol; how to effectively and properly dispute unpaid claims; fill out required WC paperwork properly; communicate work restrictions to employers; petition for a fee review; file a necessity of treatment dispute resolution; assess and communicate temporary partial disability; assess and assign permanent partial disability; understand the Wisconsin Treatment Guidelines, and much more.

Jeffrey M. Wilder, DC, FACO, CCSP, FICA

Dr. Wilder has been a leader in chiropractic for over 30 years, and was President of the WCA from 1991-1997. He has served as Chairman of the WCA Workers Compensation Committee for many years. He has served as an Expert Peer Reviewer to the Department of Workforce Development for the past 14 years, and has represented the WCA to the State Legislature during recent hearings on Workers Compensation.
