

Academy of Dentistry International

Sections may include multiple countries or states. The two largest Sections; Canada and United States have multiple Regents. A regency is a geographical area represented by a Regent in a multi Regent Section. The Canada Section is divided into two Regencies: East and West. The United States Section is divided into NorthWest, SouthWest, NorthCentral, SouthCentral, NorthEast and South East Regencies. Chapters are a singular country under the umbrella of a larger Section; Chile, Ecuador, Paraguay, Peru and Uruguay are all active chapters within the South America Section. Sections or Chapter may have their own board with officers, chairman, treasurer etc. But, the Regent is the person to report and liaison to the Board of Regents.
