Didactic and Experiential Pharmacy Courses in Public Health

ECBP: 12-16 Increase the inclusion of core clinical prevention and population health content in health professions education.

Albany College of Pharmacy and Health Sciences (ACPHS) places an emphasis on real-time interaction with local public health organizations to provide students with real field experience in public health. In addition, our core group of community pharmacy-based faculty offers a "Well-Tip" program which includes various health screenings and promotion activities for the public at local pharmacies. Additional didactic coursework in wellness/preventive medicine includes elective courses in tobacco cessation; cancer screening, prevention, and early detection; and a required course in immunizations.
