CSDA Mission

The mission of the CSDA is to promote the use of professional cutting, polishing, imaging and selective demolition contractors and their methods. In support of this goal, the CSDA Code of Ethics demands that members pursue the highest standards of safety, quality and integrity. A second objective is to provide a forum in which members can share their ideas, needs and concerns in a constructive framework to further enhance technologies, education and training.

Certifications

Operator Certification

CSDA’s Operator Certification is a comprehensive six-day program that combines detailed classroom instruction with on-slab demonstration and evaluation of advanced concrete cutting techniques. Safety, proper equipment use and efficiency are emphasized.

CSDA certified operators are recognized industry-wide for their proficiency in the full range of sawing and drilling applications.

Minimum Requirements

- Successful completion of CSDA Cutting Edge, Slab Sawing & Drilling 101, Wall Sawing 101 or Wire Sawing 101
- Three years field experience (4,500 hours)
- Successful completion of 10-hour OSHA Construction Safety course
- No more than one lost-time injury within the last three years
- Unrestricted driver’s license
- Negative drug test within 30 days of taking the course

Companies in this directory who have invested time and money to send their operators through the CSDA Operator Certification course are designated with the logo.

Operator Certification  November 10–15  Clearwater, Florida
Company Certification

The CSDA Company Certification Program is the first of its kind in the industry. This program has been created for cutting contractors to provide owners, architects, engineers, general contractors and government officials with a valuable pre-qualification tool that acknowledges sound business practices. It is available to all sawing and drilling contractors.

A company must meet the following criteria to achieve certification:

- Meet the basic safety, and insurance requirements of the industry
- Undertake sound operational and financial best practices
- Provide evidence it has took part in basic training or certification programs to better its employees and the company as a whole
- Successfully pass a written application review

Companies in this directory who have invested time and money to meet the requirements of this program and have successfully completed the application process are designated with the CSDA logo.

“The CSDA Company Certification Program made us take a look at our business from another angle and analyze how we do things. This has not only resulted in us winning jobs through our certified status, but has improved us from an operational standpoint.”

—Dan Foley, Cobra Concrete Cutting Services Co.

</table>
Networking at the Annual Convention and Quarterly Meetings

The number one benefit for members has always been the opportunity to network with cutting professionals at the annual convention and quarterly meetings. This networking provides opportunities to forge new relationships and learn from other experienced professionals.

CSDA Training and Certification Programs

Over 4,000 students have graduated from more than 30 classroom, hands-on and online training programs. In addition, CSDA has certification programs for companies and individual operators. See pages 8 and 9 for more details.

CSDA Safety Resources and Toolbox Safety Tips (TSTs)

The 230-page CSDA Safety Manual, CSDA 57-page Safety Handbook and five safety DVDs are designed specifically for concrete cutters and are available to members at a significant discount. TSTs can be used in employee safety meetings and can be an important part of your company's safety program. CSDA has released a total of 104 TSTs since the program began. A new TST is released every month.

World of Concrete Co-Sponsor

Members receive significant discounts on registration and educational seminars fees. CSDA also supports the industry by exhibiting at this event and sponsoring seminar sessions.

Representation with Governmental Organizations

CSDA has an Alliance with OSHA to advance the safety of cutting contractors. This partnership included issuing Best Practice and Toolbox Safety Talk documents, joint exhibitions at trade shows, review of safety materials and round tables.

Discount Programs

The Association negotiates member benefit programs with national vendors in order to provide cost-savings opportunities for CSDA Members.

- Staples
- UPS Freight
- V-BeltSupply.com

CSDA Website

The CSDA Website at www.csda.org contains a wealth of information available 24/7 in the “Members” section. The online discussion boards also provide members a forum to discuss technical issues, sell equipment, hire employees or any other relevant topics.

Concrete Openings

ConcreteOpenings at www.concreteopenings.com is the only professional magazine dedicated to concrete cutting with a circulation of over 18,000 per issue. Members can advertise at significant discounts and use the opportunity to have their job stories reach over 7,000 architects, engineers, general contractors and government officials.

CSDA Next Generation Group

The group aims to continue the growth of the association while serving the needs and wants of the younger generation, with the goal of continuing to set a standard of excellence.

Mentor Program

New Members can receive personalized assistance from a current CSDA Board or Committee member during their first year of membership.

Market Intelligence

- Helps you plan, measure, understand trends and markets.
- 3rd party non biased market research
- Surveys and reports

Other benefits and programs can be reviewed by visiting the CSDA Website at www.csda.org or call the CSDA office at 727-577-5004.

CSDA • 100 2ND AVENUE SOUTH • SUITE 402N • ST. PETERSBURG, FL 33701 • TEL: 727.577.5004 • FAX: 727.577.5012 • E-MAIL: INFO@CSDA.ORG • WWW.CSDA.ORG
In addition to this printed Membership Directory, the CSDA Website includes a “Find a Member” search tool on its home page, where specifiers of concrete cutting can locate a professional CSDA contractor serving their area through an interactive map. Simply click on an individual state or area to be presented with a list of members from that state, or use the drop-down boxes to enter more specific search criteria. Results can be printed, including full contact details for each contractor, and a map is provided to show the exact geographical location of each company. Visit www.csda.org and click on the map icon to get started.
List of Topics*

A. Specifications
- Core Drilling CSDA-C-101
- Flat Sawing CSDA-F-102
- Track-Mounted Wall Sawing CSDA-W-104
- Wire Sawing CSDA-WS-106
- Hand Sawing CSDA-HS-108
- Chain Sawing CSDA-CS-109
- Diamond Blade CSDA-DB-112
- Polishing Concrete CSDA-PC-113

B. Standards
- Blade Application Code for Diamond Saw Blades CSDA-BC-107
- Bolt Together Core Bits CSDA-BB-110
- Continuous Tube Threads CSDA-CT-111
- Measuring Concrete Micro Surface Texture CSDA-ST-115

C. Tolerances
- Tolerances and Limits for Construction Drilling and Sawing
- Basic Parameters for Concrete Drilling and Sawing Equipment

D. Best Practices
- Slurry CSDA-BP-001
- Equipment Maintenance Management CSDA-BP-002
- Hazard Identification and Debris Removal CSDA-BP-003
- Introduction to Remote Control CSDA-BP-004
- Diamond Cutting Tools for ADA CSDA-BP-005
- Hydraulic Concrete Cutting Equipment CSDA-BP-006
- Ground Penetrating Radar for Concrete Scanning CSDA-BP-007
- Polished Concrete Floors CSDA-BP-008
- Green Construction CSDA-BP-009
- Hi-Cycle Concrete Cutting Equipment CSDA-BP-010
- Establishing and Maintaining the Work Area CSDA-BP-011
- Mechanical Anchors CSDA-BP-012
- Care of Quick Disconnect Flanges CSDA-BP-013
- Images for Publication CSDA-BP-014
- Green Polishing and Grinding Practices CSDA-BP-015
- Silica Data Analysis Chart CSDA-BP-016

E. CSDA/OSHA Alliance Best Practices
- Highway Work Zone Safety CSDA-OBP-1001
- Reducing Silica Exposure CSDA-OBP-1002
- Defensive Driving CSDA-OBP-1003
- Electrical Safety CSDA-OBP-1004
- Scaffold Safety CSDA-OBP-1005
- Ladder Safety CSDA-OBP-1006
- Distracted Driving CSDA-OBP-1007
- Hearing Conservation CSDA-OBP-1008

Seven Reasons to Specify CSDA Contractors

1 Safety
Methods employed by CSDA Contractors are non-disruptive, vibration-free and allow for job completion with reduced noise, dust and debris. Professional cutting, polishing and imaging operators are committed to safety and follow all appropriate procedures.

2 Time Savings
Cutting or polishing with diamond tools and imaging with GPR is faster than comparable survey, renovation or demolition methods. Professional cutting, polishing and imaging contractors have the knowledge to evaluate each unique job situation and determine the best approach. They are efficient and skilled, and they get the job done right the first time.

3 Cost Savings
The systems used by CSDA contractors provide significant cost advantages over conventional methods. These include increased productivity, reduced downtime and fewer operators needed to accomplish the job. These professionals are well prepared to bring projects in on time and within budget.

4 Reduction of Liability
General contractors and other specifiers can reduce their liability by entrusting their jobs to trained professionals who are experts in their field. These professionals have the training and experience to select the best procedures to employ at any stage of a project.

5 Quality of Work
CSDA contractors know which types of tools and equipment are best for each application, and they have a good understanding of working clearance, disposal and other construction site issues. They complete tasks to the specified tolerances while overcoming challenges such as heavily reinforced concrete, confined spaces and time constraints.

6 Latest Technology
Modern, efficient equipment can be used for a wide range of applications. The equipment provides many capabilities while allowing for precision work and the safeguard of structural integrity. This equipment is also designed to create minimal disruption to the surrounding jobsite.

7 Access to CSDA Resources
Specifiers have access to professional CSDA cutting, polishing and imaging contractors, including those who have achieved Certified Operator status or have attained Company Certification by completing industry-specific certification programs.
Online Specifier Resources from CSDA

Architects, engineers, general contractors and government officials—virtually everyone who is involved in specifying sawing, drilling, polishing, and imaging services in their daily work, have 24/7 online access to the Concrete Sawing & Drilling Association’s (CSDA) resource guides and specifications. Besides offering the Resource Guide as a printed document, CSDA also has this guide available electronically and free of charge at www.csda.org. The Resource Guide is just one of the tools that CSDA provides for specifiers. The Architect/Engineer Resources section on the home page of the CSDA Website includes a “Need a Contractor” feature, where specifiers can submit project details and request bids from CSDA contractors by completing of a simple online form. This area of the website also contains PDF versions of individual Standards, Specifications, Tolerances and Best Practices. In addition, each job story published in Concrete Openings magazine can be downloaded for reference from the Techniques page of www.concreteopenings.com, where they are arranged by application.
The Concrete Sawing & Drilling Association is a nonprofit trade association of contractors, manufacturers and affiliated members from the construction and renovation industry. Diamond tools for projects requiring sawing, drilling, selective demolition, polishing and imaging offer the construction industry many benefits including lower total project costs, precision cutting, maintenance of structural integrity, reduced downtime, reduced noise, dust and debris, limited access cutting and the ability to cut heavily-reinforced concrete. Founded in 1972, CSDA has 500 member companies worldwide.
