**CSDA Mission**

The mission of the Concrete Sawing & Drilling Association is to promote the use of professional specialty sawing and drilling contractors and their methods. In support of this goal, the CSDA Code of Ethics demands that members pursue the highest standards of safety, quality and integrity. A second objective is to provide a forum in which members can share their ideas, needs and concerns in a constructive framework to further enhance concrete sawing and drilling technologies.

Operator Certification

CSDA’s Operator Certification is a comprehensive six-day program that combines detailed classroom instruction with on-slab demonstration and evaluation of advanced concrete cutting techniques. Safety, proper equipment use and efficiency are emphasized.

CSDA certified operators are recognized industry-wide for their proficiency in the full range of sawing and drilling applications.

Minimum Requirements

- Successful completion of CSDA Cutting Edge, Slab Sawing & Drilling 101, Wall Sawing 101 or Wire Sawing 101
- Three years field experience (4,500 hours)
- Successful completion of 10-hour OSHA Construction Safety course
- No more than one lost-time injury within the last three years
- Unrestricted driver’s license
- Negative drug test within 30 days of taking the course

Companies in this directory who have invested time and money to send their operators through the CSDA Operator Certification course are designated with the logo.

Operator Certification  November 4–9  Clearwater, Florida
Company Certification

The CSDA Company Certification Program is the first of its kind in the industry. This 3-tier program has been created for cutting contractors to provide owners, architects, engineers, general contractors and government officials with a valuable pre-qualification tool that acknowledges sound business practices. It is available to all sawing and drilling contractors. A company must meet the following criteria to achieve certification:

Level 1

- Meet the basic safety, financial and insurance requirements of the industry
- Successfully pass a written application review

Level 2

- Undertake sound operational and financial best practices in addition to the criteria set out for the first level
- Provide evidence it has took part in basic training or certification programs to better its employees and the company as a whole
- Successfully pass a written application review

Level 3

- Have a total quality management system in place
- Provide evidence it is committed to a high standard of safety and sound business practices
- Pass an industry-specific quality audit, conducted onsite, which mirrors the internationally recognized standard ISO9000

Companies in this directory who have invested time and money to meet the requirements of this program and have successfully completed the application process are designated with a logo that corresponds to the level of certification achieved.

Member Benefits

Networking at the Annual Convention and Quarterly Meetings
The number one benefit for members has always been the opportunity to network with cutting professionals at the annual convention and quarterly meetings. This networking provides opportunities to forge new relationships and learn from other experienced professionals.

CSDA Training and Certification Programs
Over 3,000 members have graduated from more than 20 classroom, hands-on and online training programs. In addition, CSDA has certification programs for companies and individual operators. See pages 8 and 9 for more details.

CSDA Safety Resources and Toolbox Safety Tips (TSTs)
The 230-page CSDA Safety Manual, CSDA 57-page Safety Handbook and five safety DVDs are designed specifically for concrete cutters and are available to members at a significant discount. TSTs can be used in employee safety meetings and can be an important part of your company’s safety program. CSDA has released a total of 100 TSTs since the program began. A new TST is released every month.

Representation with Governmental Organizations
CSDA has an Alliance with OSHA to advance the safety of cutting contractors. This partnership included issuing Best Practice and Toolbox Safety Talk documents, joint exhibitions at trade shows, review of safety materials and round tables.

Discount Programs
The Association negotiates member benefit programs with national vendors in order to provide cost-savings opportunities for CSDA Members.
• Staples
• UPS Freight
• V-Belt

CSDA Website
The CSDA Website at www.csda.org contains a wealth of information available 24/7 in the “Members” section. The online discussion boards also provide members a forum to discuss technical issues, sell equipment, hire employees or any other relevant topics.

Concrete Openings
ConcreteOpenings at www.concreteopenings.com is the only professional magazine dedicated to concrete cutting with a circulation of 17,000 per issue. Members can advertise at significant discounts and use the opportunity to have their job stories reach over 7,000 architects, engineers, general contractors and government officials.

CSDA Next Generation Group
The group aims to continue the growth of the association while serving the needs and wants of the younger generation, with the goal of continuing to set a standard of excellence.

Mentor Program
New Members can receive personalized assistance from a current CSDA Board or Committee member during their first year of membership.

Market Intelligence
• Helps you plan, measure, understand trends and markets.
• 3rd party non biased market research
• Surveys and reports

World of Concrete Co-Sponsor
Members receive free registration and significant discounts on educational seminars fees. CSDA also supports the industry by exhibiting at this event and sponsoring seminar sessions.

Other benefits and programs can be reviewed by visiting the CSDA Website at www.csda.org or call the CSDA office at 727-577-5004.

Find a Member Online

In addition to this printed Membership Directory, the CSDA Website includes a “Find a Member” search tool on its home page, where specifiers of concrete cutting can locate a professional CSDA contractor serving their area through an interactive map. Simply click on an individual state or area to be presented with a list of members from that state, or use the drop-down boxes to enter more specific search criteria. Results can be printed, including full contact details for each contractor, and a map is provided to show the exact geographical location of each company. Visit www.csda.org and click on the map icon to get started.
### List of Topics*

#### A. Specifications
- Core Drilling CSDA-C-101
- Flat Sawing CSDA-F-102
- Track-Mounted Wall Sawing CSDA-W-104
- Wire Sawing CSDA-WS-106
- Hand Sawing CSDA-HS-108
- Chain Sawing CSDA-CS-109
- Diamond Blade CSDA-DB-112
- Polishing Concrete CSDA-PC-113

#### B. Standards
- Blade Application Code for Diamond Saw Blades CSDA-BC-107
- Bolt Together Core Bits CSDA-BB-110
- Continuous Tube Threads CSDA-CT-111

#### C. Tolerances
- Tolerances and Limits for Construction Drilling and Sawing
- Basic Parameters for Concrete Drilling and Sawing Equipment

#### D. Best Practices
- Slurry CSDA-BP-001
- Equipment Maintenance Management CSDA-BP-002
- Hazard Identification and Debris Removal CSDA-BP-003
- Introduction to Remote Control CSDA-BP-004
- Diamond Cutting Tools for ADA CSDA-BP-005
- Hydraulic Concrete Cutting Equipment CSDA-BP-006
- Ground Penetrating Radar for Concrete Scanning CSDA-BP-007
- Polished Concrete Floors CSDA-BP-008
- Green Construction CSDA-BP-009

Seven Reasons to Specify Sawing and Drilling

1. **Safety**
   Sawing and drilling are non-disruptive demolition methods that are vibration-free and allow for job completion with reduced noise, dust and debris. Professional sawing and drilling operators are committed to safety and follow appropriate cutting procedures.

2. **Time Savings**
   Sawing and drilling with diamond blades, core bits or wire saws are faster than comparable renovation or demolition methods. Professional cutting contractors have the knowledge to evaluate each unique job situation and determine the best approach. They are efficient and skilled, and they get the job done right the first time.

3. **Cost Savings**
   Diamond cutting systems provide significant cost advantages over conventional removal methods. These include increased productivity, reduced downtime and fewer operators needed to accomplish the job. Cutting professionals are well prepared to bring projects in on time and within budget.

4. **Reduction of Liability**
   General contractors and other specifiers can reduce their liability by entrusting their sawing and drilling job to trained cutting professionals who are experts in their field. These professionals have the training and experience to select the best sawing and drilling procedures to employ at any stage of a project.

5. **Quality of Work**
   Cutting contractors know which types and sizes of saw blades, drill bits and diamond wires are best for each application, and they have a good understanding of working clearance, disposal and other construction site issues. They create cuts to the dimensions required while overcoming challenges such as heavily reinforced concrete, confined spaces and time constraints.

6. **Latest Technology**
   Modern, efficient cutting equipment can be used for a wide range of applications. The equipment provides large bulk removal capability while allowing for precision cuts and maintaining structural integrity. This equipment is also designed to create minimal disruption to the surrounding job site.

7. **Access to CSDA Resources**
   Specifiers have access to professional CSDA sawing and drilling contractors, including those who have achieved Certified Operator status or have attained Level 1, 2 or 3 Company Certification by completing industry-specific certification programs.
Online Specifier Resources from CSDA

Architects, engineers, general contractors and government officials—virtually everyone who is involved in specifying sawing, drilling, polishing, and imaging services in their daily work, have 24/7 online access to the Concrete Sawing & Drilling Association’s (CSDA) resource guides and specifications. Besides offering the Resource Guide as a printed document, CSDA also has this guide available electronically and free of charge at www.csda.org. The Resource Guide is just one of the tools that CSDA provides for specifiers. The Architect/Engineer Resources section on the home page of the CSDA Website includes a “Need a Contractor” feature, where specifiers can submit project details and request bids from CSDA contractors by completing of a simple online form. This area of the website also contains PDF versions of individual Standards, Specifications, Tolerances and Best Practices. In addition, each sawing and drilling job story published in Concrete Openings magazine can be downloaded for reference from the Techniques page of www.concreteopenings.com, where they are arranged by application.
The Concrete Sawing & Drilling Association is a nonprofit trade association of contractors, manufacturers and affiliated members from the construction and renovation industry. Diamond tools for projects requiring sawing, drilling, selective demolition, cutting and polishing offers the construction industry many benefits including lower total project costs, precision cutting, maintenance of structural integrity, reduced downtime, reduced noise, dust and debris, limited access cutting and the ability to cut heavily-reinforced concrete. Founded in 1972, CSDA has 500 member companies worldwide.
