What is IACP?

The International Academy of Compounding Pharmacists (IACP) is an association representing more than 3,600 pharmacists, technicians, students, and members of the compounding community who focus upon the specialty practice of pharmacy compounding. Compounding pharmacists work directly with prescribers including physicians, nurse practitioners and veterinarians to create customized medication solutions for patients and animals whose healthcare needs cannot be met by manufactured medications. More than 150,000 patients and prescribers also belong to our organization via the grassroots advocacy group, Partnership for Personalized Prescriptions (P3). IACP's mission of protecting, promoting and advancing personalized medication solutions is critical for patient healthcare.

Who attends IACP Meetings?

IACP's Annual *Compounders on Capitol Hill* is attended by top-level compounding pharmacists and technicians from across the country. Attendees are the leaders in the compounding profession and the decision makers in the pharmacy. We anticipate hosting more than 400 registrants in 2017.
