Introduction

The Management Consulting Competency Framework defines the competences and standards for management consultants, and forms the basis of the IMC USA's Certified Management Consultant® qualification (CMC®). The competences presented herein set forth the knowledge, skills and behaviors required of successful management consultants. There are three levels of progression – development (consultant), independence (management consultant) and mastery (CMC), all underpinned by professional behaviors and ethics.

This framework builds on the initial work undertaken by the International Council of Management Consulting Institutes in developing the CMC® qualification during 2006, and was further expanded by the Institute of Management Consultancy (UK) into a broader and more robust model which reflects leading practices across the profession.

The CMC® qualification is relevant for all practicing consultants to management, including those in large and medium-sized firms, niche firms, internal consultants, networked groups, and independent consultants, and will continue to remain a core offering of the Institute of Management Consultant USA. It defines the “fully competent consultant” and broadly speaking, is targeted at those who:

- Have at least 3 years experience as a consultant;
- Have at least a Bachelor's Degree or two additional years consulting experience with documented professional development
- Are experienced in all elements of the consulting life cycle;
- Can take full ownership for delivery of a project or a major work stream;
- Have experience in managing others; and
- Have demonstrated their contribution is highly valued by clients.

IMC USA wishes to acknowledge the work which has been put into document by both its members and those of the Institute of Management Consultancy (UK), upon who work this document is based.

A Higher Standard of Competence and Performance

Developmental Stage	Early	Advanced	Mastery
Expertise	Provides technical skills/ experience to a project. Developing skills defined by Common Body of Knowledge and Competency Framework.	Secures, designs, and manages small consulting projects. Practices skills consistent with Common Body of Knowledge and Competency Framework	Can secure, design, and manage large, complex, team-based consulting projects. Meets highest international standards of competence, including IMC USA CBK and CF
Scope	Narrow specialty in a technical discipline / industry	Applies expertise across industries and disciplines	Creates new approaches to applying expertise across industries and disciplines
Organization focus	Tactical support to middle mgrs	General business advice to managers and executives	Broad strategic advice to senior managers and executives/Board of Directors
Value to Client	Solves technical/tactical problems	Recommends and implements solutions to client needs	Sought by and considered a partner by executives. Long term engagements and retainer relationships are the norm
Commitment to Profession	May belong to technical and/or trade associations and to IMC USA. Does not subscribe to a formal code of ethics	Member of IMC USA and bound to IMC USA Code of Ethics. Has obtained CMC [®] certification	Member of IMC USA and bound to IMC USA Code of Ethics. Has obtained CMC [®] certification. Actively contributes to profession
Experience	Up to 3-5 years as an external or internal consultant	5-15 years as an external or internal consultant with experience managing increasingly large complex projects	Greater than 15 years as an internal or external consultant

A Competence Based Professional Qualification for Individual Consultants

The Institute of Management Consultants USA believes in a sector-wide definition of management consulting:
“Management consulting is the providing to management of objective advice and assistance relating to the strategy, structure, management and operations of an organization in pursuit of its long-term purposes and objectives. Such assistance may include the identification of options with recommendations; the provision of an additional resource and/or the implementation of solutions.”

The definition of management consulting is a key driver for the development of our competence framework.

The Competency Framework

The IMC USA Competency Framework defines those competencies required to be a successful management consultant. The competences are the behaviors, skills and knowledge that a management consultant is expected to understand, apply and demonstrate. IMC USA’s Competency Framework is built upon the Common Body of Knowledge and the core competencies described in this document, both of which are aligned with ICMCI’s requirements for reciprocity of the CMC with other affiliated IMC organizations.

An effective Management Consultant requires a balance of behaviors, skills and knowledge

- Market Capability & Knowledge

This is the application of fact-based knowledge of technical skills, business understanding, sector insight, and external awareness.

- Consulting Competence

These are the core consultancy skills, tools, and techniques which are essential in delivering consulting services.

- Professional Skills and Behaviors, and Ethics

These define the professional skills, behaviors, and attitudes which act as “enablers” in achieving market capability, knowledge and Consulting Competence. They establish the level of credibility and trust between the client and the consultant.

A Successful Management Consultant Requires a Combination of Skills

“Management consultants are those organizations and/or individuals that participate in the process of management consulting within a framework of appropriate and relevant professional disciplines and ethics designed for the activity of management consulting.”

Source: Institute of Management Consultancy, definition in self-regulation paper

The successful management consultant requires a combination of skills, and provides strategic and tactical solutions to a client. These include:

- Change management skills
- Technical and business knowledge
- Business understanding
- Ownership, management and delivery of solutions to clients
- Project delivery and risk management
- Interpersonal skills
- Ability to transfer skills to others
- Creative and analytical thinking
- Adherence to a code of conduct and ethical guidelines

Skill Requirements for the Next Generation of Management Consultants

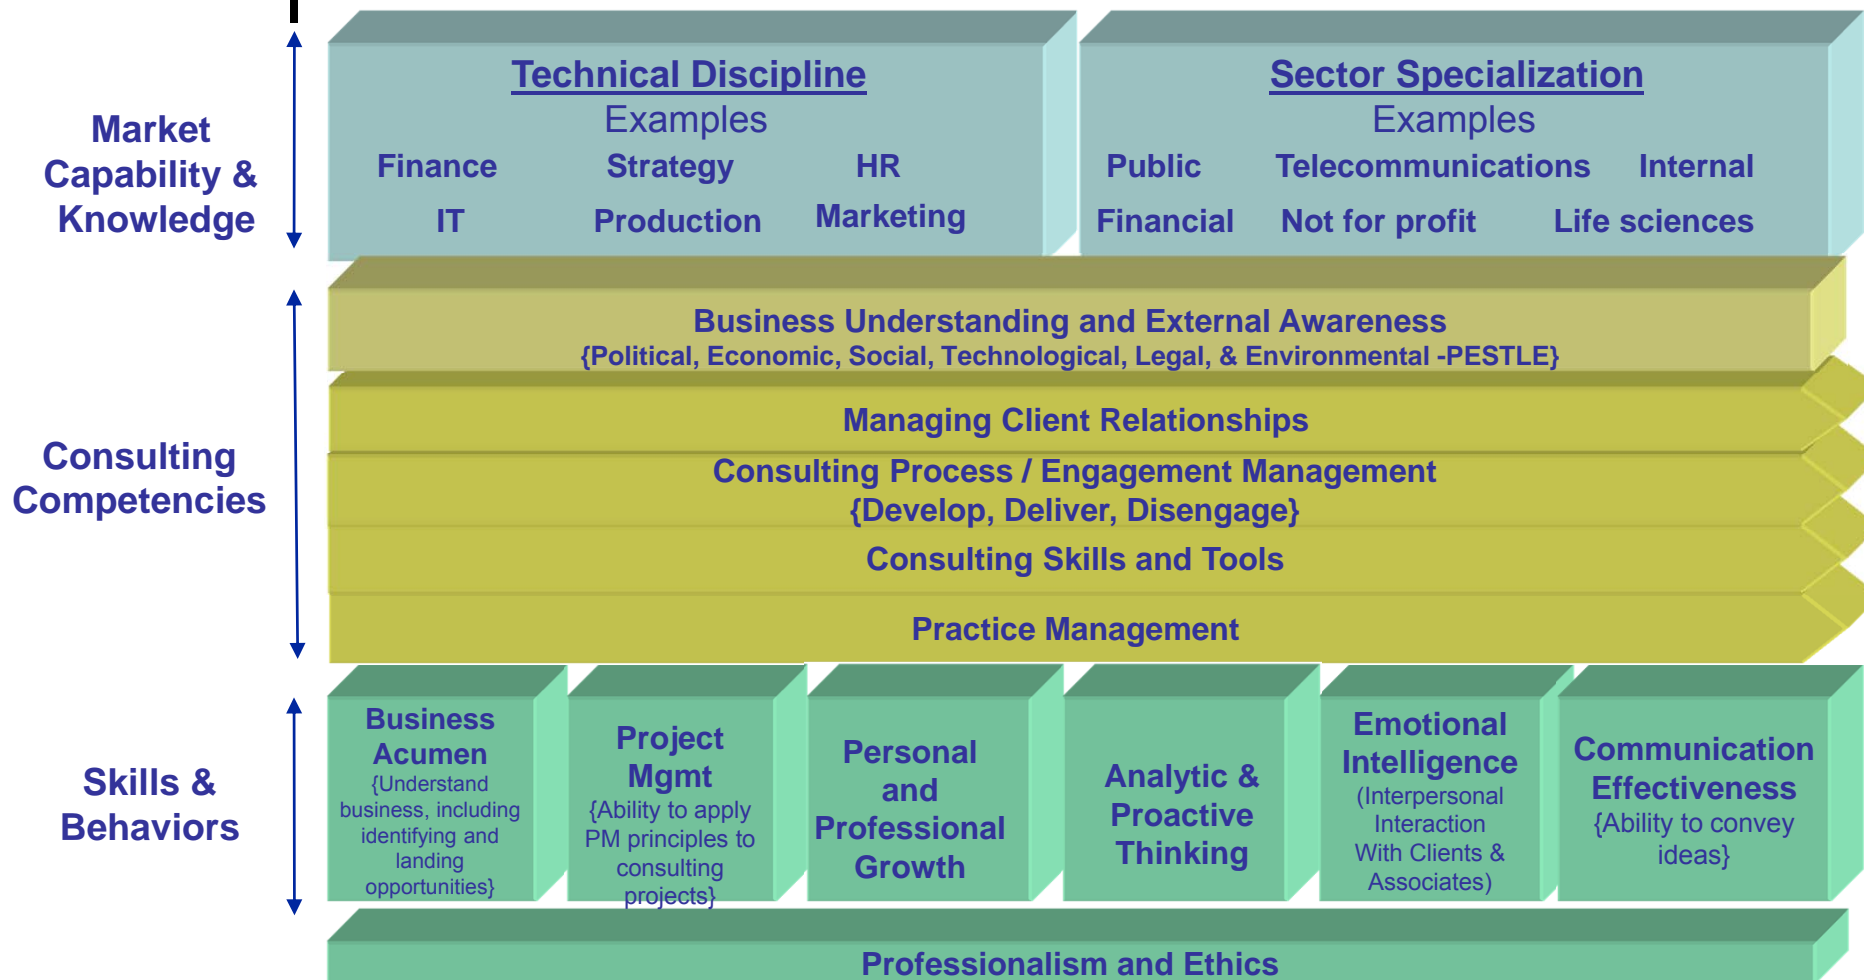

Some initial observations ...

- The boundaries of what constitutes management consulting are becoming blurred. Larger consultancies are offering services spanning strategy to outsourcing
- There are low barriers to entry for individual practitioners, and thus clients are becoming more selective buyers.
- Clients are demanding specialized technical knowledge or skills provided by the expert not the generalist
- The balance is shifting from traditional IQ based measures to emotional intelligence as predictor of excellence and success
- The future of work is changing. New organization models and growth in networked practices are impacting the future work of adults
- The value of information is diminishing as availability increases. Effective sourcing and application of knowledge is becoming a differentiator

This competence framework builds on the current CMC model. It aims to give a closer definition of the baseline for all those operating in the management consulting profession as well as considering the skills required for the next generation of emerging management consultants.

IMC USA Competency Framework

CMC® has demonstrated market capability and knowledge, and consulting competence supported by a balance of professional skills and behaviors.

Professional Skills & Behaviors

Skills & Behaviors

Professional skills & behaviors act as the enablers to achieve market capability and consulting competence. They include professionalism and ethics. They are entry level prerequisites for becoming a successful consultant.

Professional Skills & Behaviors

Professionalism and Ethics

Operates with professionalism and integrity in all aspects of role including conduct, appearance, adherence to codes of practice and working in the best interests of the client.

Demonstrated Behaviors

- Adheres to IMC USA's Codes of Professional Conduct
- Deals appropriately with ethical issues and adheres to the Institute's Ethical Guidelines

6.3 Sector knowledge	<ul style="list-style-type: none"> Demonstrates knowledge of one of more sectors 	<ul style="list-style-type: none"> Applies technical expertise across one or more sectors 	<ul style="list-style-type: none"> Leads by example, applying management and business skills in own business Influences business thinking and agenda in one or more sectors
6.4 External awareness	<ul style="list-style-type: none"> Demonstrates a good general knowledge of political, economic, social, technological, legal and environmental factors (PESTLE) 	<ul style="list-style-type: none"> Demonstrates up to date knowledge of political, economic, social, technological, legal and environmental factors (PESTLE) impacting on sector and/or technical area of expertise 	<ul style="list-style-type: none"> Expertise is sought by external parties to advise on issues impacting own sector

Certification Questions About The Core Competencies for Management Consultants

Question set 1: Professional engagement of services

Competency Reference Number	Typical Question asked during the certification process	Comment
C1	Practice Management How do you market and sell your consultancy services?	The ability to generate new business, through individual initiative, by establishing a broad network of contacts and knowing when and how to sell ideas and services to others. The ability to establish and run a consulting business, an internal consultancy, or a consulting practice as part of a larger firm
C2	Professionalism and Ethics How do you assure the client of your integrity and competence as a consultant and define your specialty?	The ability to establish the trust of the client in you. In doing this, you will show your respect for the culture and values of the client and their organization. You must also ensure that client confidentiality is maintained. You must convince your clients that you have integrity and approach your work in an ethical fashion. A belief in one's own capability to accomplish objectives and select an effective approach to complete tasks or problems. This includes confidently expressing decisions and opinions in challenging circumstances.

These are examples of the types of questions that may be asked on written certification exams and peer review panels. It should be noted that the Institute may include an extra competency questions related to this section to find the extent of cross-cultural awareness of the candidates. This will cover the various business, ethnic and national cultures.

Question set 2: How do you successfully manage your relationship with a client?

These questions cover relationships with the client throughout the lifecycle of the individual intervention and over the course of the business relationship.

Reference Number	Typical Question asked during the certification process	Comment
C3	<p>Managing Client Relationships – Scoping Client Requirements</p> <p>How do you approach new clients and develop mutual understanding with a potential client about the possibilities for an appropriate intervention?</p>	<p>The ability to develop a rapport with client while keeping the discussions focused on the client’s needs and requirements. You must be able to provide the client with a realistic assessment of what you and your organization can do. A desire to serve clients by focusing one’s efforts on discovering and meeting the client’s real needs.</p>
C4	<p>Managing Client Relationships – Scoping Client Requirements</p> <p>How do you ensure that the client shares your perception of their situation?</p>	<p>The ability to take a “whole organization” view of both the presenting situation/problem and the options to deal with it.</p>
C5	<p>Managing Client Relationships – Communications & Presentation</p> <p>How do you present your proposals to a client?</p>	<p>The ability to present the proposal to the right people using the appropriate media. You need to be able to explain the proposal clearly, in particular being able to explain technical aspects clearly to non-experts. When discussing the proposal with technical experts, you need to be able to display the appropriate level of expertise and knowledge. You also need to respond to client comments or questions on the proposals. You should be able to persuade, convince or influence others in order to gain agreement, win support or transfer ownership of ideas or concepts.</p>

Question set 2: How do you successfully manage your relationship with a client?

These questions cover relationships with the client throughout the lifecycle of the individual intervention and over the course of the business relationship.

Reference Number	Typical Question asked during the certification process	Comment
C6	<p>Managing Client Relationships – Managing the Client Interface How do you conclude the negotiation with the client and how are the details of the agreement recorded?</p>	The ability to ensure that you are the right person from your organization to conduct the negotiation, and you need to know in advance what aspects of the proposal are susceptible to modification yet still meet the requirements of both organizations. The ability to bring two or more parties to an acceptable agreement.
C7	<p>Managing Client Relationships – Managing the Client Interface How are the contractual arrangement and fee basis agreed with the client?</p>	The ability to reach agreement and ensure that all relevant aspects of the discussion and agreed terms and conditions are clearly recorded.
C8	<p>Managing Client Relationships – Influencing How do you build on the initial rapport created with the client to produce a professional working relationship throughout the term of the assignment (and on-going if appropriate)?</p>	The ability to remain in control of the interaction and consciously and deliberately move between roles to meet the accurately hear and understand the unspoken or partly expressed thoughts, feelings and concerns of others. The ability to focus on customer needs to ensure the highest level of service is provided.
C9	<p>Managing Client Relationships – Managing the Client Interface How do you introduce, plan and control change management with a client?</p>	The ability to clarify why an intervention is planned, and how it aims to affect the performance of the client organization. You need to identify technical aspects of what is proposed and work out which people and departments from the client organization will need to be involved with which aspects of the activity. It is the ability to get behind formal organization charts to understand the key working relationships and to identify key influences and decision-makers as a basis for planning the most effective influence strategies.
C10	<p>Consulting Process - Disengagement The process by which you enable your client to take ownership of the developments which you have introduced in the intervention.</p>	The ability to be able to work with the client to help them see that they can implement and cope with change. You must be able to encourage the client to find new ways of perceiving the meaning of data information, and help them develop objective appraisal of their aims and objectives.
C11	<p>Managing Client Relationships – Managing the Client Interface How do you manage withdrawal from the client?</p>	The ability to be able to work with the client to help them see that they can implement and cope with change. You must be able to encourage the client to find new ways of perceiving the meaning of data information, and help them develop objective appraisal of their aims and objectives.

Question set 3: How do you successfully undertake an intervention?

These questions address the process steps used in approaching assignments.

Reference Number	Typical Question asked during the certification process	Comment
C12	Consulting Skills and Tools – Tools & Methodologies How do you apply appropriate diagnostic tools to determine the current position of the client?	The ability to develop an objective view of the client's need, drawn from a structured and thorough review of available data. An ability to assess the client's real and presenting need, using relevant evaluation techniques.
C13	Market Capability – Business Understanding How do you scope the intervention?	The ability to display a command of technical specialty (s) and the ability to apply them to suit client situations, recognizing the constraints within which the client has to operate.
C14	Managing Client Relationships – Scoping the Client Requirements How do you prepare a proposal for a client?	The ability to ensure that the understanding of the client's situation and opinions is accurate, and that the proposals developed meet the identified needs. An ability to ensure that each proposal explains the scope of the work to be carried out, and the methods to be used. Proposals should build on best practice and also allow for innovation and creativity. The aims, objectives and achievement criteria for the project should be clearly identified.
C15	Managing Client Relationships – Scoping the Client Requirements How do you determine the potential of each option with the client, whilst ensuring that you (or your practice) are able to deliver everything suggested within each option?	An ability to identify what existing ways there are of achieving the aims and objectives and consider what innovations to them are needed. The development of new methods needs also to be considered. In defining the objectives, you need to be able to evaluate where the client is now and how they will move forward to meet the aims and objectives.
C16	Managing Client Relationships – Managing the Client Interface How do you implement the agreed intervention and manage the client's expectations according to the agreed plan?	The ability to understand how the client expects you to work together with them, and find ways to build rapport and trust with clients. The ability to understand the effect that the client themselves will have on the interactions between you, and the ability to adopt the most appropriate role at different times during interactions.
C17	Consulting Skills and Tools – Applying Knowledge How do you identify suitable and accurate sources of information, and the methods of obtaining it?	The ability to make use of information. Driven by an underlying curiosity to understand the casual factors in any situation. This means digging beneath the surface and ensuring that hypotheses about situations are well founded on facts.

Question set 4: How do you make sure you can deliver an assignment?

These questions address how you manage your resources to ensure quality.

Reference Number	Typical Question asked during the certification process	Comment
C18	Consulting Skills and Tools – Apply Knowledge Your ability to make a clear and appropriate analysis of information which is used in the decision making process within a consultancy context.	The ability to understand complex problems and situations by analyzing a large volume of information in a systematic and logical way. the ability to understand information, distil out key points, draw logical conclusions and make appropriate decisions or recommendations.
C19	Consulting Process – Planning and Management How do you plan the use of physical resources with the client to meet the objectives of your assignment?	The ability to coordinate the acquisitions and assembly of resources, having negotiated resource allocation and use with the right people. You need to be able to ensure that the resources are there when they are needed, and you need to be able to plan for shortfalls. An ongoing aspect is the evaluation of the use of and performance of resources.
C20	Consulting Process – Planning and Management How you would ensure sufficient client staff resources with appropriate skills to meet the objectives of your assignment?	The ability to decide with your team how to distribute tasks and responsibilities. You need to make sure this allocation makes best use of team members' abilities, and provide opportunities for them to learn and develop in their roles.
C21	Consulting Process – Planning and Management How do you explain, establish and monitor the systems, processes and methods necessary for completion of the intervention?	The ability to explain what is needed, and to negotiate with those affected to identify who will do what, when and why. You need to be able to continually help people to understand what is expected of them, and also to ensure that what is happening will meet the agreed objectives. This will entail you being able to agree quality and evaluation criteria.
C22	Consulting Process – Ensuring Quality How do you ensure that all of the assignment's objectives have been met in full?	The ability to ensure that everything starts when it should and everybody knows what they are doing. You must be able to evaluate whether input and output are as intended, and to assess the overall progress against the original plan. You need to work out how to cope when things deviate from the plan, and to take the chance to improve things as they proceed.
C23	Consulting Process – Ensuring Quality How do you assess your own performance during the assignment?	The ability to assess your current performance, identify, plan and take action to meet your development needs. The drive to achieve results by setting and exceeding challenging objectives and goals, to make continual improvements, a determination to overcome obstacles and setbacks, to evaluate courses of action terms of their potential return on resources invested.
C24	Consulting Process – Planning and Management How do you manage your time within the assignment?	The ability to agree and prioritize your objectives, plan your time, delegate responsibilities to others, take decisions, and review and reschedule your activities appropriately. The ability to identify what needs to be done to achieve objectives, prioritize and establish plans to ensure an effective outcome.

Question set 4: How do you make sure you can deliver an assignment?

These questions address how you manage your resources to ensure quality.

Reference Number	Typical Question asked during the certification process	Comment
C25	<p>Consulting Process – Ensuring Quality Your ability to select and put into place suitable systems for recording, storage and retrieval of information within a consultancy context.</p>	The ability to collect, store and manage information to monitor and improve business efficiency and effectiveness.
C26	<p>Managing Client Relationships – Communications & Presentation How do you advise, educate and inform colleagues and clients on the basis of your analysis of information within a consultancy context?</p>	The ability to establish productive working relationships and find ways of improving relationships with colleagues at all levels within your consulting practice, or your consulting team, and in the client organization. You should keep appropriate people informed at the right level of detail about relevant issues, and provide people with accurate information. The ability to expand and use technical knowledge or to disseminate knowledge and technical expertise to others.
C27	<p>Practice Management The use of appropriate techniques to manage financial resources within a consultancy context.</p>	The ability to allocate, manage and monitor financial resources.
C28	<p>Practice Management How sufficient and appropriate are the consultancy hours that can be made available to fulfill the requirements of the intervention?</p>	The ability to agree and prioritize your objectives, plan your time, delegate responsibilities to others, take decisions, and review and reschedule your activities as appropriate.
C29	<p>Practice Management How do you resolve conflicts within the parameters of an assignment?</p>	The ability to work within your consulting practice's and client's systems and procedures and deal with conflicts and complaints to rectify what has happened and maintain client goodwill.

Certification Scheme

IMC USA is an ISO/IEC 17024:2003 Certifying Body for the CMC[®]

Candidates for the Certified Management Consultant[®] (CMC[®]):

- Pledge in writing to abide by the Institute's Code of Ethics
- Their professional competence is verified by:
 - Education and consulting experience
 - Client evaluations
 - Summaries of client assignments
 - Written examinations on Ethics and Consulting Competencies
- An oral examination administered by qualified CMC[®]s

Certification Scheme Consulting Experience

A CMC[®] candidate must have a minimum of three years of experience in the full-time practice of independent or internal management consulting, with major responsibility for client projects during at least one of those years.

Certification Scheme Education

A CMC[®] candidate must have earned a Bachelor's degree.

A candidate without a Bachelor's degree may apply for certification if they have a minimum of five years of experience as an independent or internal management consultant, provided they can demonstrate an ongoing commitment to professional development in management, the consulting profession and their area of specialty.

Certification Scheme References

The CMC[®] candidate must provide multiple references, most of them officers or executives of client organizations served.

These references are consulted to assure that the consulting relationship met the clients' objectives using a formal client evaluation.

Certification Scheme Summaries of Client Assignments

The CMC[®] candidate must provide written summaries of client assignments linked to their references.

Certification Scheme

Ethics & Consulting Competency Exams

The CMC[®] candidate must pass written ethics and consulting competency exams.

These exams are usually administered online.

Certification Scheme Oral Examination

The CMC[®] candidate must pass an oral examination conducted by qualified CMC[®]s, demonstrating professional competence and current knowledge in areas of specialization, application of experience, ethical behavior and understanding of the management consulting process.

In the event a candidate fails a section of the Oral Examination, they may retake that section after an appropriate period of preparation or may appeal to the IMC USA Board of Directors.

Application Streams: Basic, Advanced and Management

Recognizing a candidate's years of experience, there are three paths to certification:

- **Basic** for 3 through 9 years of consulting experience
- **Experienced** for 10 years of more of consulting experience
- **Management** for high level managers in non-consulting companies with 3 or more years of consulting experience who have been accountable and successful in major projects that involve consultants

After a review of the application, the CMC® Certification Committee may waive the written or oral examination core competency sections for the Advanced and Management streams.

CMC® Certification Renewal

Every three years, a CMC® renews his or her certificate by demonstrating continued professional development through:

- Professional Education
- Client Engagements and Practice Development
- Community Outreach
- Ethics Education

IMC USA's Competency Framework and Certification Scheme for Certified Management Consultants™ (CMC®)

Institute of Management Consultants USA
