Illinois Optometric Association Convention

September 17-20 • Itasca, IL

• ICD-10 4 Hour Course for ODs & Staff
• 10 Hours of TQ CE for ODs
• AOA/CPC & ABO Classes for Paras/Opticians/Staff
• More Special Highlights Inside!

Go to www.ioaweb.org for fast and efficient online registration!
SCHEDULE OF EVENTS

THUR SEPT 17TH
11:30am - Golf Registration
12:30pm - Shotgun Start at Bloomingdale Golf Club
5:30pm - Golf Awards and Dinner
6:00 - 8:00pm - Registration
7:30 - 9:30pm - Committee Meetings
8:00pm - Reception (Hospitality Suite)

7:00am - 4:30pm - Registration
8:00 - 11:00am - Education: Optometrists
11:00am - 2:00pm - Exhibit Hall Setup
2:00 - 4:00pm - Education: Optometrists
4:00 - 6:00pm - IOA House of Delegates
6:30 - 9:30pm - IOA Awards Reception/Entertainment
9:30pm - Reception (Hospitality Suite)

FRI SEPT 18TH
7:00am - 4:00pm - Registration
8:00 - 10:00am - Education: Optometrists
10:00am - 1:30pm - Exhibit Hall Open
Noon - 1:00pm - Past Presidents Lunch
1:30 - 3:30pm - Education: Optometrists
3:30 - 5:00pm - IOA House of Delegates
6:00 - 7:00pm - Presidential Cocktail Reception
7:00 - 9:00pm - Presidential Banquet
9:00pm - Champagne & Dessert Reception
10:00pm - Reception (Hospitality Suite)

SAT SEPT 19TH
8:00am - 1:00pm - Registration
9:00am - Noon - Education: Paraoptometrics
9:00am - 4:00pm - Education: Optometrists
Noon - 1:00pm - Optometrists Luncheon

9:00am - Noon - Education: Paraoptometrics
1:30 - 3:30pm - Education: Optometrists
3:30 - 5:00pm - IOA House of Delegates
6:00 - 7:00pm - Presidential Cocktail Reception
7:00 - 9:00pm - Presidential Banquet
9:00pm - Champagne & Dessert Reception
10:00pm - Reception (Hospitality Suite)

SUN SEPT 20TH
9:00am - Noon - Education: Paraoptometrics
9:00am - 4:00pm - Education: Optometrists
Noon - 1:00pm - Optometrists Luncheon

9:00am - Noon - Education: Paraoptometrics
1:30 - 3:30pm - Education: Optometrists
3:30 - 5:00pm - IOA House of Delegates
6:00 - 7:00pm - Presidential Cocktail Reception
7:00 - 9:00pm - Presidential Banquet
9:00pm - Champagne & Dessert Reception
10:00pm - Reception (Hospitality Suite)
It's that time of year again with the IOA Convention just around the corner. Illinois has always had one of the biggest and best optometric state conventions in the nation, and this year’s convention will be bigger and better than ever. We have worked hard to bring you an exceptional lineup of continuing education classes for both doctors and para-optometric staff, and we expect record breaking attendance this year in Itasca. We’ve set the stage for an enjoyable learning environment, and you will have ample opportunities to load up on any needed CE hours for the upcoming license renewal in 2016.

You will also discover many great opportunities to have fun, socialize, and build relationships with your staff and with other colleagues. This year I am very excited that we will host Chicago’s own Second City Comedy Club for an on-site performance at our Friday night Reception. This event is sure to leave you rolling in the aisles and will be a night you won’t want to miss! Saturday night, I have the privilege of being sworn in as your next IOA President, and I ask that you join me that night for dinner and the Champagne and Dessert Reception.

My role is to serve you both at the IOA Convention and throughout the coming year, so I look forward to seeing you there and if there is anything I can do to make your weekend even more memorable, please don’t hesitate to stop me and ask.

Friday OD/Staff/Optician/Para Course!

Friday, September 18th
9:00 - 11:00AM CONTINUES 2:00 - 4:00PM
Must attend entire course, no partial CE credit

ICD-10: Decoding the Mystery
For ODs & Staff
Eric Botts, OD

This course will show how to accurately code and submit claims to medical insurance carriers and much more. Using detailed patient examples, it will demonstrate how to code for glaucoma, cataract co-management, epilation, FB removal, high risk medication use, macular degeneration and diabetic retinopathy. A detailed explanation on how to use the ICD-10 codes will also be included. This course is specific for coding in Illinois. Have ICD-10 questions that you want answered? Email them to drvision@macomb.com to have them answered in class!
Eric Botts, OD graduated from the Southern College of Optometry in Memphis, TN. He started his first practice in the Macomb Walmart Vision Center in 1992. Since then he opened an additional office in Galesburg in 2006 and added a third location in 2009 in West Burlington, IA. His practice philosophy is to provide the most thorough eye care utilizing the latest technology. He has lectured extensively across the country on coding and billing for medial optometry since 2006. In 2007, Dr. Botts started a company named OBC Billing Specialists that helps doctors credential for all insurance plans, educates doctors on how to code and submit claims, and offers a complete insurance billing service for optometric practices. He wants to help every optometrist practice to their fullest ability: diagnosing and treating all ocular eye diseases their license allows. Dr. Botts understands the importance of receiving reimbursement for his services, and is focused on helping all optometrists receive fair payment for the care they provide, as well as have equal access to insurance panels.

Mile Brujic, OD, FAAO is a partner of Premier Vision Group, a successful three location optometric practice in Northwest Ohio. He graduated from the New England College of Optometry in 2002. He practices full scope optometry with an emphasis on ocular disease management of the anterior segment, contact lenses and glaucoma. He is active at all levels of organized optometry. Dr. Brujic is on the editorial board for a number of optometric publications. He has published over 200 articles and has given over 1000 lectures, both nationally and internationally on contemporary topics in eye care. Additionally, Dr. Brujic and Dr. Kading own Optometric Insights which provides career coaching for optometry students and emerging practitioners. As a practicing clinician, Dr. Brujic has his pulse on the realities of being in the trenches caring for patients, and the real challenges and opportunities that exist in eye care. He brings a practical approach to all of the topics that he lectures on. By providing attendees with meaningful, clinically relevant information that can be applied to improve patient care, improve office culture and ultimately improve the practice, Dr. Brujic inspires success to those that he interacts with.

Paul Chous, MA, OD, FAAO completed his undergraduate education at Brown University and UC Irvine, and then received his Masters and Doctorate of Optometry degrees with highest honors from UC Berkeley. Paul has a private practice specializing in diabetes eye care and education in Tacoma, WA. He is the author of Diabetic Eye Disease: Lessons From a Diabetic Eye Doctor (Fairwood Press, Seattle, 2003), which was included in the “Top 12 Diabetes Books” by Diabetes Update magazine in 2004. He is a feature writer for the web sites dLife.com and diabetesincontrol.com, editorial advisor to Review of Optometry and Optometry Times, American Optometric Association representative to the National Diabetes Education Program, Primary Investigator for the Diabetes Visual Function Supplement Study (DiVFuSS), and an adjunct instructor at NOVA Southeastern University College of Optometry in Fort Lauderdale, FL. Dr. Chous has authored more than 100 articles on diabetes and diabetic eye disease, frequently lectures on these topics in the US and internationally, and consults to several diabetes-related companies.

Patrick Coleman, COT, ABOC is a certified ophthalmic technician (COT) and optician (ABOC). He was a Master Instructor for the USAF Optometric Technician course and has worked as a technician, educator, and speaker for the past 26 years. His goal is to help others learn by presenting material in an entertaining and understandable way.
Jeffry Gerson, OD, FAAO graduated from optometry school from Indiana in 1997, after which he did a disease/low vision residency at the Kansas City VA. He has been in several different practice settings, including a retina referral center where he was involved in a number of clinical trials, and had access to numerous different technologies. He is currently in a private practice with both MDs and ODs and performs primary eyecare. His special interest is in retina, and he is still involved in clinical trials. He writes for several journals, and has a regular column in Optometric Management.

Carlo Pelino, OD, FAAO is a 1994 graduate of the Pennsylvania College of Optometry. In 1995 Dr. Pelino completed a PCO ocular disease residency at the John F. Kennedy Memorial Hospital in Philadelphia, where he concentrated in retina and neuro-ophthalmic disease. Dr. Pelino is currently a full time Assistant Professor at the Pennsylvania College of Optometry and is director of the optometric retina service at The Eye Institute. He recently completed a one year retinal fellowship emphasizing medical and surgical treatments under the direction of vitreo-retinal surgeons at Crozier-Chester and Riddle Memorial Hospitals in suburban Philadelphia. Dr. Pelino is a fellow in the American Academy of Optometry. He regularly lectures in domestic and international programs.

Joseph Pizzimenti, OD, FAAO is an Associate Professor at Nova Southeastern University (NSU) College of Optometry. He is an internationally recognized speaker and author on Ocular Disease, and a Fellow of both the American Academy of Optometry (AAO) and the Optometric Retina Society (ORS). He served as ORS President from 2012-2014. He has completed funded clinical research in the areas of diabetes, age-related macular degeneration, vitreomacular adhesion, and low vision. His scientific articles have appeared in a host of peer-reviewed journals. Dr. Pizzimenti co-authored a chapter on Diabetic Retinopathy in the textbook entitled Diabetes in Black America. He resides in Boca Raton, FL, with his wife, Dr. Claire Pizzimenti, and their three children.

Stuart P. Richer, OD, PhD, FAAO is Director of the Ocular Preventive Medicine Laboratory at the Captain James A Lovell Federal Health Care Center Eye Clinic for veterans and navy patients. He earned an OD, MS (physiologic optics) simultaneously from UC Berkeley in 1981, a VA residency certificate in 1982, and a PhD in human physiology and biophysics in 1996 from Chicago Medical School. He’s an associate professor of Family and Preventive Medicine at Chicago Medical School, assistant professor at the University of Illinois Department of Ophthalmology / Eye and Ear Infirmary and holds two additional faculty appointments in clinical optometry at ICO and UMSL. Actively involved in primary care optometry for 30 years and prevention for 20 years, Dr. Richer has special interests in aging, prescribing nutrients in the intervention of age related macular degeneration, low-tension glaucoma, cataracts and dry eye.
Important Information

Attendees are responsible for printing their course handouts which will be available online at www.ioaweb.org after August 17th. Contact the IOA office if questions at 217-525-8012.

OPTOMETRIC CONTINUING EDUCATION COURSES

Friday, September 18th

8:00 - 9:00am

Ocular and Periocular Pain: Causes and Coping Strategies .......................... Joseph Pizzimenti, OD

Pain is a feeling triggered in the nervous system. It may be sharp or dull. Pain may come and go, or it may be constant. This course presents the pathobiology, cause, proper diagnosis, and management of ocular and periocular pain.

Keeping an Eye on Obesity ............................................................................................. Carlo Pelino, OD

This course will educate the optometric physician on the ocular manifestations of obesity. It will also concentrate on the etiology, pathophysiology, and biochemistry of obesity, a rising epidemic in the optometric community.

9:00 - 11:00am

Pharmacotherapy of Ocular Disease - TQ ................................................................. Joseph Pizzimenti, OD

The ability to use pharmaceutical agents has enabled Optometrists to become true health care providers. This course includes the use of drugs that are both topically applied and systemically administered. Clinical cases are used to illustrate indications, mechanisms of action, contraindications, adverse effects and dosage of these therapeutic agents.

Neuro-Ophthalmic Disease in the Optometric Practice - TQ .............................. Carlo Pelino, OD

This course will review important clinical neuroanatomy and physiology. Brain tumors, meningitis, pituitary tumors, optic neuritis and pseudotumor cerebri will be discussed.

9:00 - 11:00am continues 2:00 - 4:00pm

ICD-10: Decoding the Mystery ...................................................................................... Eric Botts, OD

This course will show how to accurately code and submit claims to medical insurance carriers and much more. Using detailed patient examples, it will demonstrate how to code for glaucoma, cataract co-management, epilation, FB removal, high risk medication use, macular degeneration and diabetic retinopathy. A detailed explanation on how to use the ICD-10 codes will also be included. This course is specific for coding in Illinois.

2:00 - 4:00pm

The Eye in Dermatologic Disease - TQ ................................................................. Joseph Pizzimenti, OD

The goal of this presentation is to provide a review of the ocular complications of common dermatologic disease.

True Ocular Emergencies - TQ .................................................................................... Carlo Pelino, OD

This course will be presented in a grand rounds fashion. It will review the true ocular emergencies that present to an optometric office.
Saturday, September 19th

8:00 - 10:00am

OCT in Optometry: Changing the Paradigm ................................................................. Mile Brujic, OD
This course will reinforce the fundamentals of OCT interpretation along with the evolution of contemporary care in the era of spectral domain technology.

AREDS 2: Lessons Learned and Driving Under the Influence of Carotenoids ....Stuart Richer, OD
This course reviews and comments on the recently published AREDS II Randomized Trial Report #3 (AMD) and #4 (CATARACT) as well as the overall design of the study. Dietary carotenoids - lutein (meso) & zeaxanthin - repletion improves glare disability, glare recovery and contrast sensitivity in most people within a few months. Carotenoids may even protect our patients against developing AMD. New research suggests carotenoids can improve temporal processing speed, visual-motor coordination and cognition- all especially important for older drivers.

1:30 - 2:30pm

Medical Truth - A Primer ............................................................................................Stuart Richer, OD
This course will cover knowledge learned from 33 years of experience of full time patient care practice at a major urban medical center, while educating dozens of residents, optometry and medical students. It will also include favorite caveats for trainees and resources for diagnosing and treating the ‘patient in the chair’.

1:30 - 3:30pm

Anterior Segment Assault Treating Common and Uncommon Conditions ..........Mile Brujic, OD
We are challenged on a day-to-day basis with numerous anterior segment conditions. This course will cover both common and uncommon anterior segment disease states. We will discuss contemporary diagnostic and treatment options available to help better manage our patients.

2:30 - 3:30pm

Blue Light and Carotenoids – From Protection to ‘Performance’ ..........................Stuart Richer, OD
Indoors LED lighting, cell phone and computer displays all emit “bad blue” radiation. While lens manufacturers have embraced “bad blue” light protection with new tints, it is dietary lutein and zeaxanthin that offers decisive protection. The dietary carotenoids uniquely improve visual performance thru optical and non-optical biological ocular and cerebral mechanisms – all without disruption of our precious human circadian rhythms.

Sunday, September 20th

9:00am - 4:00pm

You’re Sick! The Case for Ocular Preventative Medicine - TQ ..........Jeffry Gerson, OD & Paul Chous, OD
With the number of people getting annual eye exams far outnumbering those getting an annual physical, ODs are often on the front line of not only ocular care, but also general healthcare. Much of the advice that we can give to patients is no different than that that would be given by a PCP, endocrinologist, cardiologist, or other doctor. The case will be made to expand beyond just “simple” eyecare, and move to more holistic patient care. Cases will be used to illustrate in a practical manner how such changes in eyecare can help with overall health and wellness.
SPECIAL EVENT

Friday Night Entertainment - The Second City Comedy Tour

The Second City opened its doors on a snowy Chicago night in December of 1959. No one could have guessed that this small cabaret theatre would become the most influential and prolific comedy theatre in the world. With its roots in the improvisational games of Viola Spolin, The Second City developed an entirely unique way of creating and performing comedy.

Our alumni list is a veritable “Who’s Who” of comedy including Bill Murray, John and Jim Belushi, Steve Carell, George Wendt, Tina Fey, Tim Meadows, Joan Rivers, John Candy, Bonnie Hunt, Stephen Colbert, Chris Farley, Harold Ramis, Rick Moranis, Jack McBrayer, Jason Sudeikis and so many more. The Second City is always original, daring, and hilarious. For over fifty years, we’ve taken our act on the road, performing at performing arts centers, colleges, clubs, theatres, fundraisers, festivals, and now it is your turn!

Join us Friday evening for a night full of laughter!

DON’T MISS THESE OTHER CONVENTION HIGHLIGHTS

- THURSDAY -
IOA Annual Golf Outing

- FRIDAY -
IOA Awards Reception & Dinner

- SATURDAY -
Presidential Cocktail Reception
Champagne & Dessert Reception by TLC

- THURSDAY/FRIDAY/SATURDAY -
Hospitality Suites
**FRIDAY, SEPTEMBER 18TH**

8:00 - 9:00am  
- Ocular & Periocular Pain: Causes & Coping Strategies - Pizzimenti  
- Keeping an Eye on Obesity - Pelino

9:00 - 11:00am  
- Pharmacotherapy of Ocular Disease - Pizzimenti  
- Neuro-Ophthalmic Disease in the Optometric Practice - Pelino

9:00 - 11:00am continues 2:00 - 4:00pm  
- ICD-10: Decoding the Mystery - Botts

2:00 - 4:00pm  
- The Eye in Dermatologic Disease - Pizzimenti  
- True Ocular Emergencies - Pelino

**SATURDAY, SEPTEMBER 19TH**

8:00 - 10:00am  
- OCT in Optometry: Changing the Paradigm - Brujic  
- AREDS 2: Lessons Learned and Driving Under the Influence of Carotenoids - Richer

1:30 - 2:30pm  
- Medical Truth - A Primer - Richer

1:30 - 3:30pm  
- Anterior Segment Assault Treating Common & Uncommon Conditions - Brujic

2:30 - 3:30pm  
- Blue Light and Carotenoids - From Protection to 'Performance' - Richer

**SUNDAY, SEPTEMBER 20TH**

9:00am - 4:00pm  
- You're Sick! The Case for Ocular Preventative Medicine - Gerson & Chous

**Staff/Optician/Para Courses**

**Friday, September 18th**

- **9:00 - 11:00am continues 2:00 - 400pm**
  - ICD-10: Decoding the Mystery (AOA/CPC)  
  See page 3 for full description.

**Saturday, September 19th**

- **8:00 - 9:00am**
  - Wavefront Aberration Analysis & Visual Impact (AOA/CPC, ABO)  
  Patrick Coleman, COT, ABO  
  This lecture will cover what visual aberrations are present within the optical system of the eye, how those aberrations can be measured using wavefront technology, and how vision can be negatively impacted by these aberrations. We will also look at how some of these aberrations can be negated with optical devices (glasses or contact lenses) and the impact all of this has on patients and the clinical practice.

- **9:00 - 10:00am**
  - Pupillary Pathway & Testing (AOA/CPC, ABO)  
  Patrick Coleman, COT, ABO  
  This course will cover the anatomy of the afferent pupillary pathway and the efferent pupillary pathway. Then the proper way to perform pupillary response tests will be covered, to include evaluating the direct, consensual, accommodative and swinging flashlight results (i.e., APD testing.) Finally, recording the results will be demonstrated.

- **1:30 - 2:30pm**
  - Manual Lensometry Concepts (AOA/CPC, ABO)  
  Patrick Coleman, COT, ABO  
  This one hour lecture on the manual lensometer will examine what it can be used to find in a pair of glasses, some of the common parts of the lensometer, how to operate it properly, and how to ‘neutralize’ a pair of single vision glasses or ‘standard’ bifocals using the manual lensometer.

- **2:30 - 3:30pm**
  - Extraocular Motility & Cover Testing (AOA/CPC, ABO)  
  Patrick Coleman, COT, ABO  
  This course will show how to correctly test and evaluate the extraocular muscles of a patient. Attendees will learn which paired muscles are being ‘tested’ in each cardinal position so they can identify poor or non-functioning extraocular muscles. Next, the correct way to perform the “Cover Test” will be shown which will help determine if the patient has orthophoria, heterophoria, or heterotropia, and what that actually means!

**Sunday, September 20th**

- **9:00 - 11:00am**
  - Ocular Anatomy & Physiology (AOA/CPC, ABO)  
  Patrick Coleman, COT, ABO  
  This course goes beyond just “basic” ocular anatomy. The ocular structures around and within the eye will be discussed along with their primary functions. Attendees will be shown key external landmarks on or around the eye and why they are important. The major bones of the ocular orbit that surround the eye will be discussed as will the six extraocular muscles that control eye movement. Finally, the visual pathway will be explored, with an explanation of how vision and the visual field could be affected at each point along that pathway.

- **11:00am - Noon**
  - Ocular Disorders (AOA/CPC, ABO)  
  Patrick Coleman, COT, ABO  
  This course will examine some of the common ocular disorders that an optician or technician will see coming through the office. The course will show pictures of the disorders, describe the signs and symptoms of the disorder, and discuss ways to help differentiate one disorder from another. Understanding these disorders will help an optician or technician interact more appropriately with patients, enabling them to provide better care and service.

In order to bring you an innovative, informative and exciting conference this year in Itasca, please note procedures:

- - - - - On-line registration begins in July. Go to the IOA website, www.ioaweb.org. Now everyone can take advantage of this fast and efficient method of registration, so register early and receive the early bird discount!

- - - - - OD participants will be assigned a bar code number which will be scanned at the beginning and end of each class. This procedure will confirm your attendance at class!

- - - - - You will receive a ticket for each course that you sign up for ~ course changes can be made on-site based on space availability. This procedure will ensure course size, so everyone gets a great seat!

- - - - - Attendees will be responsible for printing their own copies of handouts. Handouts will be available online at www.ioaweb.org after August 17th, and will remain online for at least 30 days following Convention. If you are unable to access the handouts and would like copies provided, please notify the IOA at 217-525-8012 or email katie@ioaweb.org. We appreciate your consideration of cost savings to the Association as well as avoiding waste with overprinting.

The meeting room temperatures may vary so please dress in layers and remember to bring a jacket or sweater. Business casual dress code is recommended. Saturday's banquet requires semi-formal attire.

IOA adheres to the US FDA’s policy on industry supported educational activities. IOA policy requires, among other things, that we conduct the educational program supported by any corporate educational grants independently and without control by the grantor of the program’s planning, content or execution. Furthermore, the programs must be free of commercial bias for or against any product.
