Michigan Health Center SITES

45 Health Center organizations

operate at more than 260 sites across seven regions in Michigan

For site addresses and contact information, see pages 16–113.

Site locations on this map are approximate representations, not exact locations.
WHO WE ARE, WHAT WE DO

The Michigan Primary Care Association (MPCA) is a leader in building a healthy society in which all residents have convenient and affordable access to quality health care. MPCA’s mission is to advocate for and enhance comprehensive, accessible, innovative, and affordable community-based health services while influencing and advancing health policy at the state and national level.

For more than 35 years, MPCA has been the voice for health centers and other community-based providers in Michigan. MPCA was founded in the late 1970s as a networking organization of health centers and stakeholders interested in fostering primary care in rural underserved communities across the state. The association quickly broadened its scope to include underserved urban communities, and today, 45 Michigan health centers provide quality, affordable, comprehensive primary and preventive health care for more than 680,000 people at more than 260 sites.

OUR SERVICES

Clinical Support and Quality Improvement
The MPCA supports the delivery of quality health care services in Michigan through training and support in: integrated care inclusive of primary care, dental and behavioral health, Patient-Centered Medical Home recognition and sustainability, health information technology optimization, data-driven improvement processes, informatics, preventive services, evidence-based chronic disease management, and infectious disease and immunization health care initiatives. In addition, the Michigan Quality Improvement Network, Michigan’s Health Center Controlled Network, supports health centers as they improve quality of care through implementation and adoption of health information technology.

Communications
The MPCA uses internal and external communication strategies to increase awareness about Michigan health centers, broaden grassroots advocacy messages, educate the public, support MPCA teams, share information, and gain new community and political allies.

Data Analysis
The MPCA analyzes data to highlight the need for redistributing the supply of primary care, dental health, and mental health professionals to areas with the highest need; support proposals presented to grantmakers, policymakers, legislators, and partner organizations; and identify trends and interventions to improve the health of underserved communities and vulnerable populations.

Education and Training
The MPCA hosts education and training events throughout the year to strengthen and improve the ability of Michigan health centers to deliver high-quality health care to medically underserved communities. MPCA’s education and training programs are developed in response to health center needs and interests and are a mix of in-person, web-based, and peer-networking opportunities.
Enabling Services
MPCA provides training and peer-learning opportunities, offers technical assistance, and curates resources across a wide spectrum of enabling services—including supports provided by community health workers in a patient care team. MPCA’s outreach, education, and enrollment services give Michigan health centers the tools they need to provide community-based assistance for patients to gain and maintain access to comprehensive, affordable health coverage through Medicaid, MIChild, Healthy Michigan Plan, and health plans offered on the health insurance marketplace.

Health Center Growth
With the goal of 100 percent access to health care in Michigan and zero health disparities, MPCA assists health centers and communities in determining the best approach to providing access to care. MPCA supports needs assessments, the expansion of health care delivery capacity, efforts to strengthen safety net providers, and collaboration.

Member Services
MPCA strives to provide member benefits essential to the effective operation of its members. Information sharing is critical, and MPCA works to facilitate regular meetings of health center leaders throughout the seven regions as well as through all member meetings and events. MPCA evaluates the needs of members and develops programs and strategies to ensure our members can serve communities.

Operational Support
MPCA provides direct support to Michigan health centers in the areas of billing and finance, emergency management, service delivery integration and excellence, compliance with program requirements, board governance, and many others. We support the sharing of best practices through numerous Peer Communication Networks, which serve as a forum for staff and board members to share, learn, and improve the quality of Michigan health centers.

Policy and Advocacy
MPCA strives to be on the cutting edge of health care policy at both the state and federal levels. Whether it’s legislative or regulatory issues, from big picture ideas to minute details, MPCA actively evaluates the health care environment to bring “need to know” information on new and upcoming policy developments to ensure Michigan health centers have the knowledge they need to thrive now and in the future. Each year, MPCA identifies policy priorities that will improve the ability of health centers to provide quality, affordable health care services to all in need and we work closely with our members to promote the importance of grassroots advocacy in shaping the issues affecting health centers every day. Through our work with policymakers and elected officials, MPCA advocates for policies that assure all Michigan residents have access to quality, affordable primary and preventive health care within their communities.
Special Populations
MPCA works with members and partner agencies to better understand and respond to the needs of Michigan’s homeless individuals and families, residents living with HIV, LGBTQ population, veterans, and migrant agricultural workers.

VirtualCHC
VirtualCHC, the Michigan Primary Care Association’s Information Technology team, is a one-stop-shop for health information technology needs. Using technology-based solutions to fill common needs, VirtualCHC can support the environment for electronic health and dental records and help manage productivity solutions and other specialty software. VirtualCHC has the device management options to help ensure computers, tablets, and phones are protected from modern threats. Consulting services are available for anything from assisting with vendor selection to local IT support.

Workforce Development
MPCA places a strong emphasis on developing and monitoring workforce development initiatives to increase the effectiveness of health professional recruitment and retention programs for MPCA and Michigan health centers.

BOARD OF DIRECTORS
MPCA is guided by an eleven member board of directors composed of representatives from seven regions, the clinical services committee, health center board member committee, and the chief financial officer network. The executive committee consists of board president, president-elect, treasurer, secretary, and the health center board member committee chair. The chief executive officer serves on the board and executive committee as an ex officio member.

The fundamental principles on which health centers were established more than 50 years ago set them apart from other providers of health care. Health Centers:

- Are located in or serve medically underserved areas or populations.

- Are governed by a community board composed of 51 percent or more of health center patients who represent the population served.

- Provide comprehensive primary health care services as well as support services (e.g. education, translation, transportation) that promote access to health care.

- Offer services to all with fees adjusted based on the ability to pay.

- Meet strict performance and accountability requirements regarding administrative, clinical and financial operations as established by the federal government.

Michigan Health Centers are part of a nationwide network of more than 1,300 health centers spread across 50 states and all U.S. territories that provide care for 24 million people in more than 9,000 communities.
Of Michigan’s 45 health centers, 38 are Health Center Program grantees, three are FQHC Look-Alikes, and five are Indian Health Services organizations (one is both a Health Center Program grantee and an Indian Health Services organization).

Each health center’s staffing models, facilities, scope of services, and approaches are tailored to meet the unique needs of its patients and surrounding communities. Many individuals have difficulty accessing medical care because of where they live, the language they speak and their complex health care needs. Health centers provide culturally appropriate health care close to where the patients live, at convenient times and in languages patients understand.

Health centers have professionally trained health care teams. These teams may include board-certified or board-eligible physicians, nurses, nurse practitioners, physician assistants, certified nurse midwives, medical assistants, pharmacists, mental health and substance abuse professionals, dentists, and dental hygienists. The clinicians of each team work together to provide a core of primary and preventive health services to individuals and families from pediatric through geriatric.

Section 330E Community Health Centers

Community health centers were developed in 1965 in response to community need for improved health services for inner city populations. As part of the federal government’s War on Poverty, funding was made available for communities to establish primary care centers to provide comprehensive health services, regardless of the ability to pay. Although there have been many changes to the Health Center Program over the years, its foundation remains the same—to provide high-quality primary and preventive health care to people in rural and urban medically underserved areas. Medical underservice is defined by a shortage of professionals or health services and high rates of poverty and infant mortality. It may also include special considerations, such as lack of Medicaid providers, lack of bilingual services, or a large percentage of uninsured persons.

Section 330G Migrant Health Centers

Migrant health centers were established in 1962 to provide comprehensive primary care services to migrant and seasonal agricultural workers and their families in a culturally sensitive environment.

Like health centers, migrant health centers provide comprehensive health care services to their target population at an affordable price, regardless of insurance status. Migrant health centers use culturally sensitive clinical protocols, bilingual health personnel, and lay outreach workers.
About Health Centers

Section 330H  Health Care for the Homeless Health Centers

Modeled after a demonstration project jointly funded by The Robert Wood Johnson Foundation and Pew Charitable Trust, the Health Care for the Homeless program was initiated in 1987 as part of the Stewart B. McKinney Homeless Assistance Act. In 1996, Congress passed the Health Centers Consolidation Act, which joined the Health Care for the Homeless program to the community, migrant, and public housing primary health care programs under a single authority called the Consolidated Health Center Program. The Health Care for the Homeless program provides federal grants to non-profit organizations to deliver primary health care and substance abuse services to homeless individuals and families.

The Health Care for the Homeless program provides a multidisciplinary approach to the delivery of care by combining systems of primary care, substance use disorders and mental health services, patient management, and education with aggressive outreach.

Section 330I  Public Housing Health Centers

The Public Housing Primary Care Program was established to support the provision of accessible and comprehensive preventive and primary health care services to residents of public housing. Health promotion and disease prevention are emphasized, and primary health care services are provided on the premises of public housing developments or at other locations immediately accessible to residents of public housing.

Federally Qualified Health Center Look-Alikes

Federally Qualified Health Center (FQHC) Look-Alikes are health centers that have been certified by the Centers for Medicare & Medicaid Services (CMS), based on recommendations provided by the Health Resources and Services Administration (HRSA)/Bureau of Primary Health Care (BPHC), as meeting all Health Center Program requirements. This certification makes them, like Health Center Program grantees, eligible for fair reimbursement through Medicaid and Medicare and for participation in the 340B federal drug pricing program. They also assist in recruiting and retaining providers through the National Health Service Corps and the State Loan Repayment Program. FQHC Look-Alikes do not receive funding under the Health Center Program.
Indian Health Service

The most prominent provider of health services to American Indians is the Indian Health Service (IHS). The IHS provides both direct care and contract care to members of federally recognized tribes on or near federal reservations with comprehensive health care services, which include medical, community health, dental, and mental health/substance abuse services.

Ryan White Program, Part C

Health care organizations funded under the Ryan White Early Intervention Services program provide a comprehensive continuum of outpatient HIV primary care services, including HIV counseling, testing, and referral; medical evaluation and clinical care; other primary care services; and referrals to other health services. Community health centers, migrant health centers, and Health Care for the Homeless sites funded under Section 330 of the Public Health Service Act may receive Part C grants.

What is a Patient-Centered Medical Home?

The Patient-Centered Medical Home (PCMH) is an approach for providing quality, comprehensive, coordinated primary and preventive care to adults, youth, and children. At its heart, this model of care fosters strong relationships with patients and their families to better care for the person as a whole.

PCMHs deliver higher quality care that comprehensively addresses an individual’s needs. The intended outcomes of a high-functioning PCMH health center include improved patient outcomes, patient safety, and patient experience. PCMHs can potentially lower costs through the delivery of evidence-based patient care, reducing waste and improving efficiencies, increasing delivery of preventive services, and fostering population health management.

Many of the PCMH goals rely on improved communication and coordination among health care providers and patients and increased patient engagement through a high-functioning medical team.

The Health Resources and Services Administration and the Bureau of Primary Health Care support Health Center Program grantees in achieving PCMH recognition. More than 75 percent of Michigan Primary Care Association members have achieved PCMH recognition and accreditation via the Accreditation Association for Ambulatory Health Care, The Joint Commission, and the National Committee for Quality Assurance. MPCA provides leadership, guidance, support, and customized technical assistance to members; to improve PCMH initiatives.
