Definition of E-Cigarettes, Electronic “Vaping”/ENDS Products for Registration/Intake Counselors

Electronic cigarettes (e-cigarettes) and other electronic “vaping” products, are battery-powered, usually contain liquid nicotine, and produce an aerosol instead of smoke. You may also know these products as vape-pens, hookah-pens, e-hookahs, e-cigars, or e-vaporizers.

DRAFT MDS ENDS Recommendations

Example for Question to Assess Type of ENDS Product Used

Question	Response Options	Notes
What type of E-cigarette or E-vaping product to you most frequently use?	<ul style="list-style-type: none">• Cartridge type• Tank system type• Disposable type• Other• I don't know• I'd rather not answer	Asked by Cessation Coaches during 1 st counseling call and only of those that indicated use of ENDS within past 30 days

Questions for the Panel

- Please describe the process the MDS ENDS workgroup engaged in to arrive at their final recommendations.
- In your opinion, what was the hardest issue the MDS ENDS workgroup tackled and why?
- As we continue to learn more about E-cigarettes, what additional resources or guidance would you like to see NAQC create (with input from NAQC members)?
