The Art of Clinical Supervision:  
The Secret to Successful Mentoring and Communication  
Sophia F. Dziegielewski, Ph.D., LCSW

Workshop Description: 
This intense workshop is designed to explore ways of providing enhanced supervision in the clinical setting. The seminar introduces and examines how people learn to maximize the educational experience. Adult learning principles and specific techniques will be applied to increase supervisory understanding, support, education and evaluation of supervisees.

Seminar Objectives: 
Participants will be able to:
1. Identify three different learning styles and how to maximize teaching, learning and communication in supervisory sessions.
2. Identify two factors that can be considered obstacles to effective communication in the supervisory relationship.

Important Questions Addressed:
What type of adult learner are you AND what type of adult learner is your supervisee? How can you better help your supervisee to master important clinical information in the supervisee relationship?

Workshop leader will be Dr. Sophia F. Dziegielewski. Selected books by the presenter will be available.
