New York State Psychological Association
Division of Neuropsychology
Fall Half-Day Conference

October 22, 2016                New York University                New York, NY

Theme: Current Issues for Neuropsychological Practice

Schedule:

8:00 am – 9:00 am               Registration
9:00 am – 10:15 am
Dr. Stephen Honor
Workers’ Compensation & No-Fault Claim
Evaluations for Neuropsychologists

10:15 am – 10:30 am             Break
10:30 am – 11:45 am
Dr. J. Lawrence Thomas
A Survey of Biofeedback and Neurofeedback
Treatment Modalities

11:45 am – 12:15 pm             Break
12:15 pm – 1:30 pm
Dr. Frank J. Corigliano
The Ethical Practice of Tele-Neuropsychology

1:30 pm – 1:45 pm               Break
1:45 pm – 2:30 pm
Panel Discussion & Questions
The NYSPA Neuropsychology Division’s Board has developed an informative program for Saturday, October 22, 2016. It consists of three workshops led by very knowledgeable practitioners of neuropsychology, who will provide a vast array of information on a set of diverse topics related to Workers’ Compensation and No-Fault Insurance Claims, Biofeedback and Neurofeedback for patients with medical/neurologic conditions/disease, and the practice of Teleneuropsychology.

This half-day conference will be the first of many conferences and lectures planned for the 2016-2017 cycle. We expect all those attending will benefit from the information presented and enjoy the lively discussion planned at the conclusion of the day’s program.

Stephen Honor, Ph.D., ABPP

Dr. Honor’s workshop will focus on workers’ compensation (WC) and no-fault cases, how each of these systems work and how we as neuropsychologists fit into the picture. Program will cover: How to become part of each of these systems; the nature of referrals for both systems; differences in billing requirements; independent medical evaluations (IMEs) - what are they, how do you deal with them, how do you guide your patients; WC-treating head injury and WC issues in similar cases; redress if denied; dealing with attorneys; and more...

J. Lawrence Thomas, Ph.D.

Dr. Thomas’ workshop will review the utility of biofeedback and neurofeedback treatment modalities for treating disorders such as hypertension, migraine headaches, traumatic brain injury, ADHD, bipolar disorder and other related medical disorders. Resources for training, professional organizations and references will be provided. A brief demonstration of 4-channel and 19-channel EEG biofeedback will be given. There will also be discussion as to whether or not there is enough scientific evidence to indicate we can improve brain physiology.

Frank J. Corigliano, Ph.D.

Dr. Corigliano’s will present several core models as they relate directly to the application of Telepsychology for Neuropsychologists. The presentation will include Dr. Corigliano’s "5 Telepsychology Services Model" delineating opportunities for providing Teleneuropsychological assessment, intervention, rehabilitation, remediation, consultation, supervision, and training/education and the "7 Lenses Approach to Developing a Telepsychology Program." Dr. Corigliano will provide samples of relevant research, which demonstrate the effectiveness of video teleconferencing for clinical interviews, cognitive screening, neuropsychological assessment, and neuropsychological rehabilitation. He will distill best practices, and guidelines by the Department of Defense and the American Telemedicine Association and resources such as the 50 State Review of the progress of Telepsychology in the United States.
Speaker Biographies

Dr. Stephen Honor
Dr. Honor earned a Ph.D. in Clinical Psychology from Hofstra University. He maintains a full-time practice in forensic and clinical neuropsychology in Smithtown, NY for the past 40 years. He is board certified by the American Board of Professional Psychology (ABPP) in Clinical Neuropsychology (ABCN), Forensic Psychology, (ABFP), and Clinical Psychology (ABPP). He is a Fellow of the American College of Forensic Psychology, the National Academy of Neuropsychology, and the American Academy of Forensic Psychology.

His experience includes serving as a Medical Advisor to the Department of Health and Human Service. He has testified locally and nationally in a number of legal cases, including murder, personal injury and custody evaluations. He has also given a number of professional lectures. He has also taught graduate courses in forensic examination as a faculty member at Touro College.

He is an active member of the NYSAN, serving on the Professional Affairs Committee and the Workers’ Compensation/No-Fault Committee.

Professional Written Works:

Dr. J. Lawrence Thomas
Dr. Thomas earned his bachelor’s degree from the University of California, Berkeley and Ph.D. from the City University of New York in Clinical Psychology in 1980. He has post-doctoral training in group therapy, cognitive therapy, relationship therapy, and neuropsychology. He completed a neuropsychology internship at Brooklyn VA Hospital and a Clinical Psychology internship at Bellevue Psychiatric Hospital.

He has held faculty appointments at Albert Einstein College of Medicine and New York University Medical Center. He practices clinical psychology and neuropsychology, specializing in diagnosing and treating adult ADHD, learning disorders, and mild head injury for more than three decades. He maintains a psychotherapy and neuropsychology practice in New York City.

Dr. Thomas is board certified in EEG Biofeedback (BCIA). He is a member of the NAN, APA Division 40 & 42, New York Neuropsychology Group, Learning Disability Association, and a Fellow of the Foundation for Behavioral Heath. He has been awarded the Distinguished Service Award, NYSPA (6/2000), among others.

Dr. Thomas has published on the topics of neurofeedback for TBI, neurotherapy, treatment strategies for TBI, chronic pain, stress/anxiety, depression, and ADHD.

Professional Written Works:

Dr. Frank J. Corigliano
Dr. Corigliano earned a bachelor’s degree in psychology from Baruch College, CUNY. He then earned a Master’s degree in psychology from Teachers College of Columbia University and a Ph.D. in clinical psychology from Saint John’s University in 2010. During his graduate training he completed externships at Bellevue Hospital Center in adult inpatient psychiatry and Columbia University Medical Center in Adult neuropsychology. He completed his Psychology Internship at Friends Hospital and two Postdoctoral Fellowships at The Osborne Association and at The Institute for Human Identity.

He is currently a Staff Psychologist at The Institute for Human Identity. He specializes in telemedicine and telepsychology and has given many talks on the topics at national and international conferences. He is scheduled to present at the APA’s upcoming Annual Convention in Boulder, Colorado.
