Agenda

• Intro of speakers
• What we’re going to cover
• Summary
• Questions and answers
Learning Objectives

• Learn about different perspectives on what a healthy organization is and be able to craft your own point-of-view.

• Explore the variety of variables contained in what is “healthy” and our synthesis into a new framework.

• Join in further clarifying and sharing your experiences with what we need to create and the implications for how to carry that out.
Historical Perspective

- Was important outcome early, but has lost prominence in field
- Early Beckhard view (1969)
- Important to our field in future @ our 50th Anniversary
Literature Synthesis – Themes
Literature Synthesis

- Definitions of terms
  - Social definitions
  - Literal definitions
  - Lack of agreement on definitions, terms, meaning, and usage of words

- Confusion
  - Research
  - Practice
Literature Synthesis

• Research and Practice
  • Repeatable methods
  • Real-world problem solving

• Gaps
  • Gap between academia, consultants, practitioners, and leaders continues to grow
  • Lack of knowledge transfer and willingness to share
  • Academia: Scientific internal/external validity
  • Leaders: Knowledge must be actionable if it is to be useful
Literature Synthesis

• The literature shows organization health rests within the organization’s:
  • Culture
  • Leaders
• A common suggested practice, although not common in actual practice, is employee engagement and involvement in defining, designing, and sustaining health in organizations.
Literature Synthesis

• Change Initiatives
  
  • Range: Situational to an ongoing way of being
  
  • Some researchers suggest removing employees (including leaders) exhibiting toxic, narcissistic, and deviant behaviors
  
• Employees
  
  • Not asked to participate in change initiatives
  
  • Use of self – responsibility
  
• Interventions
Literature Synthesis

• Interventions
  • Organization culture change
  • Individual (employee) change

• Gaps
  • Varied initiatives
  • Usage
  • Sustainability
## Interventions

<table>
<thead>
<tr>
<th>Culture</th>
<th>“Something Happens”</th>
<th>Status Quo</th>
<th>Do Nothing</th>
</tr>
</thead>
</table>
| • Mission Vision  
• Values  
• Shared Beliefs  
• Ex: Google | • Leader who influences culture intervention  
• “Something” value perception defined by leader  
• Ex: Aetna, General Mills | • External - Wellness Vendors  
• Internal – Wellness Programs  
• EAP | • Problem continues  
• Things get worse  
• Costs increase  
• Lives lost |
Our health always seems much more valuable after we lose it.

– Author Unknown
Literature Synthesis

• Outliers
  • Strategy
  • Corporate citizenship
  • Mindfulness, awareness and consequences
  • Whole System: individual, organization, community, society

• Intervention Outliers
  • On going; not an end state not a process but an ongoing way of being
  • Mutual Relationship and responsibility: organization, leaders, employees, customers, and government
“In spite of the escalating costs of unhealthy organizations, leaders and shareholders continue to focus on maximizing productivity and profitability at the expense of overall organization and employee health thus creating an infinite loop of loss in productivity, profitability, and health.”
– Dr. Debra Lindh
Relevance Today

• From *Beyond Performance* (Keller and Price, 2011) and others, they have found “that when companies manage with an equal eye to performance and health, they more than double the probability of outperforming their competitors”.

• From 2003-2011, healthy companies generated total returns to shareholders three time higher than unhealthy ones.
  • Based on on-going McKinsey studies and their measures of health and performance
Our Model

- Multi-layered
- Surrounded by an environment of continuous turbulence
- Supported by leadership

Every organization is perfectly designed to get the results it’s getting

Hanna
Organization Health

• A whole system concept in an open system environment

• To be healthy the organization needs:
  • an environmentally aligned purpose and direction
  • effective organizing and operating practices
  • a human system with productivity and well-being
  • sustainability levers in learning, changing and citizenship
  • an effective guidance system in leadership and governance
Model of Organization Health

- Leadership/Governance
- Citizenship
- Learning/Change Capability
- Well-Being
- HS
- M
- ENVIRONMENT

Dimensions & Components

• **Human System/Well-Being**
  • Low Stress Climate
  • Engagement
  • Wellness (mental, physical, spiritual)
  • Work motivation (meaning, challenge, value alignment, autonomy, information & resources, supporting workspace, involvement/voice. Inclusion, humanistic treatment, learning, growth & development opportunities)
Dimensions & Components

• **Sustainability Levers**
  - *Learning & Change Capability*
    - Sensing system; feedback
    - Knowledge management
    - Innovation
    - Agility, adaptability
    - Resilience, renewal
    - Continuous improvement practices
    - Critical, balanced metrics

• **Citizenship**
  - Wide stakeholder inclusion
  - Social responsibility; communities and planet
“In times of change, learners inherit the world, while the learned remain beautifully equipped to deal with a world that no longer exists”

Hoffer
“The ability to learn faster than your competitors, may be the only sustainable competitive advantage”

Arie de Gues
“The ultimate competitive advantage in today’s business environment is the ability to change.”

Lawler & Worley
Dimensions & Components

• Guidance & Steering
  • Leadership/Governance
    • Systems thinking
    • Strategic thinking
    • Environmental Scanning
    • Investments in the future
    • Use of Self (awareness, EI, mindful action)
    • Sound Leader Practices (K&P)
Healthy Organizations Discussion - 1

- How do you see organization health in your organization?
- What are the components?
- What are the missing components?
- How does your view relate to our model?
Model of Organization Health

- M
- V, V, S
- HS (Well-Being)
- OF (Performance)
- Learning/Change Capability
- Citizenship
- Leadership/Governance
Healthy Organizations Discussion - 2

- Describe your best experiences with organization health.
- How does this show up?
- How have you experienced it?
- What is the best you have seen?
- Share specific examples
