Figure 2
Science of Nursing Education Model

BUILDING A SCIENCE OF NURSING EDUCATION

Identify Gaps in Knowledge

Identify Outcomes of Having a Science

Conduct Concept Analysis

“Experiment” with Innovation and Re-Building

Identify Outcomes of the Educational Process

Integrate/Synthesize Research

Test/Apply Research Findings

Conduct Systematic Inquiry/Research

Build a Database

Disseminate Research Findings

Engage in Critique of Extant Research

Build an Initial Framework

Identify Research Priorities

Identify Outcomes of the Educational Process

Employ a Critical Mind/Questioning Spirit

Integrate/Synthesize Research
