Preface

Dear Colleagues,

SPR has the pleasure of welcoming you to Edinburgh at the Pollock Halls, University of Edinburgh, for the 37th Annual Meeting of the Society for Psychotherapy Research.

The traditional annual meeting includes a scientific program with more than 550 presentations by researchers from more than 20 countries. In addition to the Presidential Address offered by Michael Lambert, PhD, the program includes 74 Panels, 25 Paper Sessions, 12 Open Discussions, 12 Pre-Conference/Conference Workshops, 2 poster sessions with 121 presentations, and 4 business sessions. There will be 448 active participants in one or more roles as first author, moderator, discussant or workshop leader. Every effort was made to organize events with similar contents at non-competing time slots based on the key words used by authors in identifying topic areas. There will be 6 - 9 parallel events, with fewer in the morning and Saturday, and a maximum on peak attendance times like Thursday afternoon and Friday morning.

You will find a first author index, a topic index and various maps and plans in the back of the program. There will be notes about the meeting posted at the registration area in case of cancellations or other variations from this printed program.

We look forward to a successful meeting with a rich, and lively interchange between presenters and participants. It is our hope that the program will encourage the advancement of knowledge and collaboration between those in attendance.

On behalf of the Program Council and Local Organizing Committee,

Erhard Mergenthaler
Jo-anne Carlyle

Notes

Important: Due to safety and fire regulations only as many delegates including presenters are allowed in the rooms as is given in the head line of the program overview for each single room.

* The names printed in blue are the presenters of a paper or poster. Usually this also indicates first authorship. If a coauthor is marked with an asterisk this indicates that he or she is the first author but could not attend the meeting.

## Summary

The First Author Index lists authors by their first names, followed by their surnames. The page numbers indicate the pages on which the authors' work was published. This index is useful for quickly locating specific authors and their contributions within the document. The page numbers range from 14 to 84, indicating a comprehensive list across various sections and chapters.
