Collaborative Drug Therapy Agreement (CDTA):  The Road Less Traveled by Washington State Pharmacists

Faculty: Tim Fuller, R.Ph., MS, FASHP, Pharmacist Consultant, Pharmacy Quality Assurance Commission, Dept. of Health

ACPE # 0130-0000-13-084-L03-P&T | Conflict of Interest: None

Friday, November 8, 8-9:30 am | 1.5 hr. | Activity Type: Knowledge| Room: Salon B

Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists

At the completion of this program, the participant will be able to: For Pharmacist and Technicians

- Explain the fundamentals of developing and practicing under a CDTA
- Examine Publications:  MD-pharmacist survey in JAPHA, Handbook of Collaborative Drug Therapy Management (CDTM), CDTM Handbook, Pharmacy QA Commission (PQAC) Newsletter and communications, PQAC CDTA Review Form
- Describe how CDTAs are used in different pharmacy practices
- Outline the Pharmacy Quality Assurance Commissions expectations for CDTAs
- Cite evidence for understanding medication management for single medications, chronic diseases, and public health.

A little over 30 years ago, three states took the bold step of providing pharmacists with prescriptive authority- California, Mississippi, and Washington State. In each state there are restrictions. For example, in California the pharmacist must work in a tertiary care center and have advanced degrees and a residency.

In 1995 there were only 11 states with some kind of pharmacy prescriptive authority. Washington State took the step of creating a set of rules that has provided the pharmacist guidance to this day. Washington State’s CDTA efforts have led to thousands of agreements. WAC 246-863-100 established a landmark opportunity for pharmacists to enter into medication prescribing. The speaker will describe CDTA events that have occurred since that time and take a peek into the future.

Marijuana 101 for Pharmacists

Faculty: Ryan M. Caldeiro, M.D., Chief Chemical Dependency Services, Behavioral Health Service, Group Health Cooperative

ACPE # 0130-0000-13-085-L01-P&T | Conflict of Interest: None

Friday, November 8, 8-9:30 am | 1.5 hr. | Activity Type: Knowledge | Room: Salon C

Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists

At the completion of this program, the participant will be able to: For Pharmacist and Technician

- Describe effects of cannabis use on mental health
- Describe motor effects of cannabis use
- Describe the cognitive effects of cannabis use
- Discuss the evidence for potential therapeutic effects of cannabis and cannabinoids
- Recognize the potential risks with cannabis use with concurrent use of pharmacologic therapeutics

This activity will discuss the pharmacology of cannabinoids, health effects of cannabis use, potential therapeutic effects of cannabinoids and potential risks when cannabis use is combined with pharmacologic agents.
Increasing Patient Satisfaction in an Outpatient Pharmacy
Faculty: Brandelyn Bergstedt, Coordinator of Patient and Family Centered Care, Seattle Cancer Care Alliance
ACPE # 0130-0000-13-086-L04-P&T | Conflict of Interest: None
Friday, November 8, 8-9:30 am | 1.5 hr. | Activity Type: Knowledge | Room: Fallen Timbers
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist
- Identify the conflicts between patient safety and customer service
- Differentiate between customer service and patient experience
- Recruit qualified patient and family advisors
- Integrate six sources of influence to sustain meaningful change in staff practices

At the completion of this program, the participant will be able to: For Technicians
- Explain how patient perceptions of wait times change according to staff response
- Differentiate between caring and the demonstration of caring
- Debunk the myth that the customer is always right

Join Brandelyn Bergstedt as she takes you inside a 2012 project that strengthened the staff team and increased patient satisfaction in Seattle Cancer Care Alliance’s retail pharmacy. Utilizing both patient and staff input, specialists at SCCA identified specific obstacles to an outstanding patient experience and developed a training series that resulted in dramatic and sustained shifts in patients’ perceptions of staff courtesy and wait times.

Pharmacist’s Nutrition Pearls
Faculty: Susan Fluegel, Ph.D., Nutritional Biochemist, Washington State University
ACPE # 0130-0000-13-087-L04-P&T | Conflict of Interest: None
Friday, November 8, 9:40-11:10 am | 1.5 hr. | Activity Type: Knowledge | Room: Salon B
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist and Technicians
- Recognize common nutritional deficiencies
- Describe a typical at risk patient for each nutritional deficiency
- Explain how medications can contribute to nutritional deficiencies
- Examine the effects of nutritional deficiencies on drug potency and detoxification
- Discuss how nutritional deficiencies are currently diagnosed and treated

This presentation will discuss the interaction of nutrition with pharmacy.

Holistic Health and Herbal Update
Faculty: Michael Varon, R.Ph., ND, Pharmacy Supervisor, DOC MCC
ACPE #0130-0000-13-088 -L04-P&T | Conflict of Interest: None
Friday, November 8, 9:40-11:10 am | 1.5 hr. | Activity Type: Knowledge | Room: Salon C
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist and Technicians
- Explain the use of many of the over the counter natural remedies available in most pharmacies
- Discuss the benefits of holistic healing

How to Handle Management Challenges: Cases from the Community
Faculty: Jennifer Robinson Pharm.D., Clinic Assistant Professor, WSU College of Pharmacy, Julie Akers, Pharm.D., Clinic Assistant Professor, WSU College of Pharmacy and Shannon Panther, Pharm.D., Clinic Assistant Professor, WSU College of Pharmacy
ACPE # 0130-0000-13-089-L04-P&T | Conflict of Interest: advisory committee for WSU
Friday, November 8, 9:40-11:10 am | 1.5 hr. | Activity Type: Knowledge | Room: Fallen Timbers
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist and Technicians

- Identify strategies to address employee related issues
- Work with employees to create a successful work environment
- Discuss benefits and pitfalls of common methods to motivate employees
- Evaluate the importance of intrinsic vs. extrinsic motivation

During this interactive session, attendees will engage in discussion based on management and leadership cases. At the conclusion of the session, attendees will have a better understanding of pharmacy related management issues, various approaches to address challenges and employee motivation. Be prepared to fully engage, share your ideas and learn from your peers.

**Current Issues in Pharmacy Practice**
Faculty: Jeff Rochon, Pharm.D., CEO, WSPA, Leon Alzola, R.Ph., Director of Pharmacy Operations, Fred Meyer
ACPE # 0130-0000-13-090-L04-P&T | Conflict of Interest: None
Friday, November 8, 11:50-12:50 pm | 1.0 hr. | Activity Type: Knowledge | Room: Salon A
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists

At the completion of this program, the participant will be able to: For Pharmacist and Technicians

- Discuss state and federal legislative/regulatory issues pertaining to pharmacy
- List strategies to ensure pharmacy professional’s relevance in evolving healthcare models
- Describe current positive and negative trends in pharmacy practice
- Discuss strategies to educate legislators, other healthcare providers and the general public about the value of pharmacy

This program is designed to educate members on the current events pertaining to the practice of pharmacy in Washington State over the last year and near future. Members are encouraged to voice their opinions and hear those of others in this interactive session.

**Managing Chronic Disease: A Case Based Approach**
Faculty: Andrea Bishop, Pharm.D., BCACP, CDE, Faculty Pharmacist, Providence St. Peter Family Medicine
ACPE #0130-0000-13-091-L01-P | Conflict of Interest: None
Friday, November 8, 1-3 pm | 2 hr. | Activity Type: Application | Room: Salon B
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Student Pharmacists

At the completion of this program, the participant will be able to: For Pharmacist

- Explain the role of pharmacist disease state management in a patient centered medical home
- Apply clinical pearls discussed for each chronic disease
- Demonstrate effective patient education for common chronic disease states

This talk will review clinical pearls for chronic disease state management and apply this knowledge to interactive patient cases. Multiple disease states will be discussed including diabetes, heart failure, hypertension, lipids and smoking cessation.

**Preparing and Responding to Disasters and Other Emergencies in Your Community**
Faculty: Andy Stergachis, Ph.D., BPharm, Professor, University of Washington
ACPE # 0130-0000-13-092-L04-P&T | Conflict of Interest: None
Friday, November 8, 1-3 pm | 2 hr. | Activity Type: Knowledge | Room: Salon C
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists

At the completion of this program, the participant will be able to: For Pharmacist and Technicians

- List roles for pharmacists, pharmacy technicians, and public health agencies in providing emergency preparedness and response services
- Explain how the Strategic National Stockpile and regional caches of drugs and vaccines may be dispensed in affected communities during an incident
• Describe a novel mechanism for formalizing relationships between local public health departments and pharmacies
• Discuss capabilities and gaps in present-day community-wide preparedness and response
• Describe steps on how to enhance personal and family preparedness and business continuity

Northwest communities must be prepared to plan for and respond to natural disasters and the threat of deliberate exposures to biological and chemical agents. During an emergency event, there is often the need to distribute and dispense medicines and/or vaccines and health information to persons for treatment and/or prevention. While the health of our communities is dependent upon access to the expertise and services of pharmacists and other pharmacy staff, too often pharmacy is not well integrated into the preparedness planning and response efforts that are led by public health agencies. Recognizing the need for statewide consistency and a unified approach, the Washington State Department of Health supported a working group process that has led to the development of a template memorandum of understanding (MOU) for use between local health departments and pharmacies. This session will consist of presentations of roles, resources, and tools for strengthening personal, business continuity and community-wide emergency and disaster preparedness and response. The session will include an interactive facilitated discussion of a hypothetical emergency designed to identify capabilities, gaps and expectations of public health and pharmacists/pharmacies during an emergency response.

Pulmonary Arterial Hypertension: Empowering Pharmacists in Treatment Decisions Towards Improved Patient Care
Faculty: Rebekah L. Hanson, Pharm.D., BCPS, BCACP, Clinical Liaison Pharmacist, Specialty Pharmacy Services Clinical Assistant Professor, College of Pharmacy, University of Illinois Hospital and Health Sciences System Department of Pharmacy Practice, Chicago, and Julio Duarte, Pharm.D., Ph.D., Assistant Professor, Department of Pharmacy Practice, Institute for Personalized Respiratory Medicine, University of Illinois at Chicago

Supported by educational grant: Actelion Pharmaceuticals and Bayer Healthcare Pharmaceuticals, Inc.
Friday, November 8, 1-3 pm | 2 hr. | Room: Fallen Timbers | Conflict of Interest: None

Pulmonary arterial hypertension (PAH) is a rare disease with significant consequences, including serious functional impairment and premature death. If left untreated, PAH is rapidly fatal. Fortunately, over the past decade, the knowledge and understanding of this disease has greatly expanded. Furthermore, the availability of effective and more convenient oral and inhaled medications has allowed clinicians to better individualize therapy to meet patient treatment goals. Though there is no cure for PAH, effective treatment can significantly slow disease progression and clinical worsening. Given the serious nature of this disease and its rapid progression, optimal treatment selection is essential.

Accreditation (For Pharmacists)
Center for Independent Healthcare Education (Center) is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.
Center has assigned 2.0 contact hours (0.2 CEUs) for this activity. ACPE # 0473-9999-13-011-L01-P | Activity Type: Application | Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Student Pharmacists:
At the completion of this program, the participant will be able to:
• Differentiate the safety and efficacy among the various classes of medications used in the treatment of PAH
• Utilize evidence-based guidelines to select appropriate therapy to meet individualized patient treatment goals
• Recognize management approaches to care based on pathophysiology of PAH
• Discuss the role of clinical pharmacists in the management of patients with PAH

Instructions for Credit
To receive credit, participants must register, document attendance, and complete and return the Evaluation and Credit Application form. Center will upload the CE and you can access information about your completed CPE through MyCPEmonitor.net one month after the program.
Accreditation (For Technicians)
The Washington State Pharmacy Association (WSPA) is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.

Target Audience: Technician | 0130-0000-13-093-L01-T | Activity Type: Knowledge | 2.0 contact hours
At the completion of this program, the participant will be able to:
- Describe different factors including safety and efficacy when selecting therapies between various classes of medications used in the treatment of PAH
- Identify individualized patient treatment goals for PAH
- Recognize management approaches to care based on pathophysiology of PAH
- Discuss the role of clinical pharmacists in the management of patients with PAH

Instructions for Credit
To receive credit, participants must register, document attendance, and complete and return the Evaluation and Credit Application form. WSPA will upload the CE and you can access information about your completed CPE through MyCPEmonitor.net one month after the program.

Long Term Care/ASCP Academy
Moderator: Cris DuVall, BA, MS, Pharm.D, Pharmacist Supervisor, Washington State Penitentiary
ACPE # 0130-0000-13-094-L04-P&T | Conflict of Interest: None
Friday, November 8, 3:10-4:10 pm | 1.0 hr. | Activity Type: Knowledge | Room: Salon B
Target Audience: Long Term Care, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist and Technicians
- Evaluate current trends in pharmacy practice
- Propose and discuss specific issues and needs pertaining to your practice setting
- Update on state and federal legislative/regulatory issues pertaining to pharmacy
- Discuss strategies to reinforce more patient-centric mission for your profession

This CE program is designed to target the needs of pharmacists, technicians and interns working in Long Term Care pharmacy settings. We will discuss the current issues affecting pharmacy practice in general throughout The Pacific Northwest as well as how these issues relate to this practice setting. Participants will be encouraged to contribute their thoughts in this active program.

Community/Ambulatory Academy
Moderator: Steve Singer, R.Ph., Pharmacist, Bellegrove Pharmacy, Julie Akers, Pharm.D., Clinical Assistant Professor, WSU College of Pharmacy
ACPE # 0130-0000-13-095-L04-P&T | Conflict of Interest: None
Friday, November 8, 3:10-4:10 pm | 1.0 hr. | Activity Type: Knowledge | Room: Salon C
Target Audience: Community Ambulatory Pharmacist, Technicians, Students
At the completion of this program, the participant will be able to: For Pharmacist and Technician
- Evaluate current trends in pharmacy practice
- Propose and discuss specific issues and needs pertaining to your practice setting
- Update peers on state and federal legislative/regulatory issues pertaining to pharmacy
- Discuss strategies to reinforce a more patient-centric mission for your profession

This CE program is designed to target the needs of pharmacists, technicians and interns working in Ambulatory/Community Practice pharmacy settings. We will discuss the current issues affecting pharmacy practice in general throughout the Pacific Northwest as well as how these issues relate to this practice setting. Participants will be encouraged to contribute their thoughts in this active program.
Independent Pharmacy Academy (No CE for this activity)
Moderators: Holly Whitcomb-Henry, R.Ph., Owner, RXtra Care Pharmacy; Beverly Schaefer, R.Ph., Co-Owner, Katterman’s Sand Point Pharmacy, Clinical Professor, University of Washington, Kirk Heinz, R.Ph., Owner, Kirk’s Pharmacy
Activity Type: Knowledge | Disclosure: None
Friday, November 8, 4:20-5:20 pm | 1.0 hr. | Room: Salon B
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technicians, Students
At the completion of this program, the participant will be able to: For Pharmacist and Technician
- Evaluate current trends in pharmacy practice
- Propose and discuss specific issues and needs pertaining to your practice setting
- Update on state and federal legislative/regulatory issues pertaining to pharmacy
- Discuss strategies to reinforce more patient-centric mission for your profession

This CE program is designed to target the needs of pharmacists, technicians and interns working in specific pharmacy settings. We will discuss the current issues affecting pharmacy practice in general throughout the Pacific Northwest as well as how these issues relate to this practice setting. Participants will be encouraged to contribute their thoughts in this active program.

Student Academy (No CE for this activity)
Faculty: Andy Stergachis, Ph.D., BPharm, Professor, University of Washington
Friday, November 8, 4:20-5:20pm | 1.0 hr. | Activity Type: Knowledge | Room: Salon C
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Students

Andy Stergachis, Pharm.D., will discuss his career path through pharmacy practice which includes public health, academia and industry. Dr. Stergachis provides examples of different career opportunities, and a career path that he could not have foreseen when he graduated. This interactive session is meant to inspire students to take their own risks and be prepared for anything.

Saturday, November 9, 2013
Keynote: HealthCare Reform Implementation
Faculty: TBD
ACPE #0130-0000-13-096-L04-P&T | Conflict of Interest:
Saturday, November 9, 8-10 am | 2 hr. | Activity Type: | Room: Salon A
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist and Technicians

Pain: Thinking Outside of the Box with Transdermal Medications
Faculty: Dawn Ipsen, Pharm.D., Pharmacist, Kusler’s Pharmacy
ACPE # 0130-0000-13-097-L01-P&T | Conflict of Interest: None
Saturday, November 9, 10:10-11:40 am | 1.5 hr. | Activity Type: Knowledge | Room: Salon B
Target Audience: Community Ambulatory, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist
- List drugs used for transdermal treatment of neuropathy
- Prepare to consult with a provider or patient regarding transdermal pain therapies
- Cite evidence for medications often used for transdermal pain treatment
- Identify appropriate patients that could benefit from transdermal pain treatment

At the completion of this program, the participant will be able to: For Technicians
- List drugs used for transdermal treatment of neuropathy
- Recognize appropriate uses of transdermal medications for pain
- Know which drugs have evidence supporting transdermal pain use
- Identify appropriate patients that could benefit from transdermal pain treatment
What is a patient to do when the ‘gold standard’ for pain treatment has failed them? What happens when the side effects from a pain medication outweigh the benefit the medication was providing? What tools are in a provider’s toolbox to give this patient an improved quality of life? Compounded, transdermal medications may provide some of the answers to these questions! We will go through the basics of pain, types of pain, and a pharmacy based pain assessment to evaluate for appropriateness of transdermal, compounded pain medications. We will talk about the transdermal delivery system itself, the ideal drug for transdermal delivery and possible algorithms for treating various types of pain. The importance of patient follow-up for improved quality of life and function will be discussed.

**Risk Management for Pharmacists**
Faculty: Tanya Karwaki, JD, LLM, Ph.D. Student, University of Washington
ACPE # 0130-0000-13-098-L03-P&T  |  Conflict of Interest: None
Saturday, November 9, 10:10-11:40 am | 1.5 hr. | Activity Type: Application | Room: Salon C
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist and Technician
- Discuss pharmacist risk management strategies
- Illustrate key examples of expanding pharmacists’ liability
- Evaluate ethical and legal challenges facing pharmacists

This presentation focuses on risk management issues for pharmacists. Specifically, it considers available risk management strategies and highlights examples of expanding liability. Case studies are analyzed and discussed with the audience using a risk management approach to the cases.

**Health System Academy**
Moderator: Andrea Eberly, Pharm.D., BCPS, Pharmacist, Providence Regional Medical Center, Everett and Tyler Fischback, Pharm.D., Staff Pharmacist, St. Joseph Medical Center, Tacoma, WA
ACPE #0130-0000-13-099-L04-P&T  |  Conflict of Interest: None
Saturday, November 9, 10:10-11:40 am | 1.5 hr. | Activity Type: | Room: Fallen Timbers
Target Audience: Community Ambulatory, Health Systems, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist and Technician
- Discuss current trends in pharmacy practice
- Propose and discuss specific issues and needs pertaining to your practice setting
- Update peers on state and federal legislative/regulatory issues pertaining to pharmacy
- Discuss strategies to reinforce more patient-centric mission for our profession

This CE program is designed to target the needs of pharmacists, technicians and interns working in Health System pharmacy settings. We will discuss the current issues affecting local pharmacy practice in general as well as how these issues relate to this practice setting. Participants will be encouraged to contribute their thoughts in this active program.

**Know Pain, Know Gain: Quiz Game**
Faculty: Cris DuVall, BA, MS, Pharm.D., Pharmacist Supervisor, Washington State Department of Corrections
ACPE # 0130-0000-13-100-L01-P&T  |  Conflict of Interest: None
Saturday, November 9, 1:50-3:20 m | 1.5 hr. | Activity Type: Application | Room: Salon B
Sponsored by an educational grant by NASPA and Purdue Pharma, L.P.
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist
- Identify common medications and treatments used in pain management
- Illustrate main counseling points and strategies for patients with pain
- Describe common barriers for providing optimal pain management
At the completion of this program, the participant will be able to: For Technicians
- Identify common medications and treatments used in pain management
- Describe common barriers for providing optimal pain management

Often, patients with pain present unique challenges to providers. It is important to review key pain management concepts and counseling techniques in order to optimize your patient’s treatment plan. The “Know Pain, Know Gain” Pharmacy Patient Pain Counseling Competition will increase pharmacist and technician awareness and involvement in patient care opportunities involving pain management. Volunteer competitors will be selected from the audience by raffle – pick up a ticket at the door if you’d like a chance to compete and win.

Round 1 will consist of rapid fire questions to establish 3 finalists.

Round 2 will entail a case in which finalists are given three minutes to prepare then counsel in a five-minute role-play scenario. Scoring is based on the APhA-ASP Student Counseling Competition Criteria.

**WA Medicaid False Claims Act**
Faculties: Carrie Bashaw, Senior Counsel, Civil Fraud Section Chief, Washington Attorney General’s Office
ACPE # 0130-0000-13-101-L03-P&T | Conflict of Interest: None
Saturday, November 9, 1:50-3:20 pm | 1.5 hr. | Activity Type: Knowledge | Room: Salon C
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist and Technicians
- Identify types of activities that can constitute a false claim
- Recall laws prohibiting submitting false claims
- Describe legal consequences of submitting false claims

This activity will give the overview of the 2012 WA Medicaid False Claims Act, RCW 74.66

**Technician Academy: Chemical Dependency and the Pharmacy Profession, WRAPP- Washington Recovery Assistance Program for Pharmacy**
Moderator: Paul Iseminger, CPhT, Technician, Yakima Valley Memorial Hospital, Jill Carrier, RHIT, CPhT, Technician, Harborview
Faculty: William Rhodes, MSW, CDP, Program Manager, WRAPP
ACPE #0130-0000-13-102-L05-P&T | Conflict of Interest: None
Saturday, November 9, 1:50-3:20 pm | 1.5 hr. | Activity Type: Application | Room: Fallen Timbers
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist and Technician
- Consider both legal and ethical responsibility with regard to reporting suspected drug diversion and suspected impairment
- Develop a working awareness of the history, philosophy, and legal basis for the advocacy work of WRAPP in providing support and recovery assistance to pharmacy professionals whose ability to practice pharmacy with judgment, skill, competency and safety to the public may be impaired due to chemical dependence on alcohol or other drugs, emotional illness, the aging process or loss of memory and motor skills
- Identify the role that you personally can play and the actions you will take to promote awareness of the recovery services of WRAPP

WRAPP serves to protect the health and safety of the public while acting as a health resource and support of rehabilitation to pharmacists in Washington State. WRAPP is a recovery assistance program providing confidential, professional assistance to the profession of pharmacy. This presentation describes the program’s history and current status as a Health Professional’s Program. Particular emphasis will be placed on WRAPP’s ability to assist technicians with recovery.
Upper Respiratory Tract Infections: A Review of Evidence, Resistance, and Guidelines
Faculty: Jennifer Jordan, Pharm.D., Associate Professor, Pacific University of School of Pharmacy
ACPE # 0130-0000-13-103-L01-P&T | Conflict of Interest: Consulting, Speaking & Teaching for Sanofi Pasteur, Cubist Pharmaceuticals, Optimer
Saturday, November 9, 3:30-5 pm | 1.5 hr. | Activity Type: Application | Room: Salon B
Target Audience: Community Ambulatory, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacists
- Apply evidence to differentiate which patients with upper respiratory tract infections would benefit from antibiotic treatment versus self-care products alone
- Select appropriate antibiotic therapy for patients with acute otitis media, acute sinusitis, and bronchitis
- Describe local resistance patterns for common pathogens associated with upper respiratory tract infections
- Discuss the impact of childhood vaccination on antibiotic use and antibiotic resistance trends
- Recognize the clinical presentation, therapy, and prevention strategies for pertussis

At the completion of this program, the participant will be able to: For Pharmacist and Technicians
- List factors for deciding when a patient needs antibiotics vs. when self-care is appropriate.
- Recall antibiotics used for the treatment of upper respiratory infections.
- Describe local resistance patterns for common pathogens associated with upper respiratory tract infections
- Discuss the impact of childhood vaccination on antibiotic use and antibiotic resistance trends
- Recognize the clinical presentation, and prevention strategies for pertussis

Upper respiratory tract infections are prevalent, often demanding pharmacists to serve as the healthcare provider who makes self-care recommendations, provider referrals, and offer antibiotic counseling. This case-based lecture will provide an overview of acute otitis media, rhinosinusitis, bronchitis, and pertussis. Evidence for the use of antibiotic, supportive, and preventative therapy will be discussed in tandem with the impact of antibiotic resistance on local and national treatment guidelines.

Identification and Prevention of Drug Diversion in a Pharmacy
Faculty: Michael Mone, R.Ph., J.D., FAPhA, VP Associate General Counsel-Regulatory, Cardinal Health
ACPE # 0130-0000-13-104-L03-P&T | Conflict of Interest: Employee of Cardinal Health
Saturday, November 9, 3:30-5 pm | 1.5 hr. | Activity Type: Knowledge | Room: Salon C
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist and Technicians
- Describe and apply applicable federal controlled substance regulations to current pharmacy practice
- Understand the regulatory influences on controlled substance distribution and diversion prevention
- Discuss and implement methodologies for detecting prevention diversion in a pharmacy practice
- Identify and participate in community-based education of consumers to assist in the prevention of prescription drug misuse and abuse

Venous Thromboembolism: Prevention and Treatment
Faculty: Olivia Dansby, Pharm.D., PGY-2 Health-System Administration Resident
ACPE # 0130-0000-13-105-L01-P&T | Conflict of Interest: None
Saturday, November 9, 5:10-6:40 pm | 1.5 hr. | Activity Type: Knowledge | Room: Salon B
Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists
At the completion of this program, the participant will be able to: For Pharmacist
- Identify the pharmacists role in delivering evidence-based medicine in compliance with core measures
- Discuss VTE Prophylaxis and treatment across the care continuum
- Understand patient values and preferences in decision making
- Describe benefits and limitations of pharmacological treatment options
- Evaluate drug therapies on the horizon
At the completion of this program, the participant will be able to: For Technicians

- List elements of core measures
- Recognize VTE prophylaxis and treatment options
- Understand patient values and preferences in decision making

This activity will review CHEST guidelines and core measures as applied to pharmacological prevention and treatment options of venous thromboembolism throughout the care continuum.

The Hazardous Drug Rule as it Applies to all Settings

Faculty: Jeff Rochon, Pharm.D., CEO, WSPA, and Alex Truchot, MM, HEM, Sr. HSE Manager, Group Health/CBRE, and Karen Bowman, MN, RN, COHN-S, Environmental Health Specialist, Washington State Nurses Association

ACPE #0130-0000-13-106-L03 -P&T | Conflict of Interest: Alex honoraria from CBRE; Advisory for LNI Hazardous Drug Advisory Committee & WSHSC | Jeff Rochon Formerly on GSK Speakers Bureau | Karen Bowman, Hazardous Drug Advisory Committee

Saturday, November 9, 5:10-6:40 pm | 1.5 hr. | Activity Type: Knowledge | Room: Salon C

Target Audience: Community Ambulatory, Health Systems, Long Term Care, Independent, Technician, Student Pharmacists

At the completion of this program, the participant will be able to: For Pharmacist and Technician

- Explain the specifics aspects of the new Handling Hazardous Drugs Rule
- Identify key areas in various practice settings where changes in storage and handling will need to occur for compliance to be achieved
- List upcoming deadlines and understand the resources available to create a hazard assessment plan

The 2011 Legislature passed ESSB 5594, requiring the Washington State Department of Labor & Industries (L&I) to set requirements to protect workers who handle chemotherapy and other hazardous drugs. The bill required L&I to adopt rules that are consistent with but do not exceed provisions in the National Institute for Occupational Safety and Health’s (NIOSH) Alert on preventing occupational exposures to antineoplastic and other hazardous drugs in health care settings. The NIOSH drug list is quite broad and includes hormones and mental health drugs available in most pharmacies. All pharmacies in all practice setting will have to abide by these new rules.
Meeting Information and CE Information

The Washington State Pharmacy Association is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.

CPE Monitor, the continuing pharmacy education (CPE) tracking service developed by ACPE and the National Association of Boards of Pharmacy (NABP), is in use. This system allows pharmacists to log into a comprehensive electronic profile to access information about their completed CPE. All ACPE-accredited providers are required to use this system since January 1, 2013.

CE statements of credit will no longer be mailed. All continuing education credits will be uploaded to the CPE Monitor by the provider submitting the information to ACPE, which will validate the information before sending it to NABP. After CPE credits are processed by ACPE and NABP, pharmacists will be able to log into their NABP e-Profile and view all of their ACPE completed CPE. CE credits will be uploaded to the CPE Monitor within 60 days of the activity.

In order to process your CE credits, you must provide us with your correct NABP e-Profile ID number and your birth month and day (MMDD format). The NABP e-Profile ID number is a six to 8 digit number, and it is NOT your license number, NPI number or store NABP#. If you need to verify the number or have not yet registered for one, please visit www.MyCPEMonitor.net before the end of the conference.

CE Information:
Participants will need to submit an evaluation as well as the statement of attendance at the end of the conference to a WSPA staff member. For each activity attended please write the activity code next to the activity listed on the statement of attendance to verify your attendance. The code will be provided at the end of each session. The statement of attendance, your NABP e-profile ID and birth date MDD will need to be received by WSPA in order for you to receive credit. At the end of the conference you will need to turn in the statement of attendance to a WSPA staff. The yellow copy is for your records. WSPA will upload the CPE to the CPE monitor within 60 days of the conference and will send out an email letting you know when it has been completed.

Evaluations:
You will need to submit an evaluation which provides us with valuable information for planning future seminars and conventions. This year we will have a hard copy in your packet to record your thoughts and ask you to submit the information on-line. To submit the form on-line, go to www.wsparx.org and on the front-page click on “Annual Meeting”, which will take you to the Annual Meeting page where you can access the on-line Evaluation and presentations.
