Leading and Succeeding Through Change
Faculty: Megan McIntyre, Pharm.D., MHA, CPHQ, VP Pharmacy, Health Resource Services
ACPE # 0130-0000-17-039-L04-P&T | Activity Type: Application | Disclosure: None
Friday, June 2, 8:00 AM - 9:30 PM | 1.5 hr. | Room: Boardroom 5
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:
• Translate change management pearls to your pharmacy practice setting
• Describe key elements for succeeding in times of change
• Develop a strategy for improving your leadership and change management skills

The only thing constant is change! Attendees at this session will discuss and experience key strategies for succeeding in times of change, both as a leader and team member. Session will be mix of didactic presentation and hands on activities, coupled with plenty of time for dialogue.

Stroke and Clot Prevention: New Guidelines and New Drugs
Faculty: Glenda Carr, Pharm.D., Clinical Assistant Professor, Idaho State University College of Pharmacy
ACPE # 0130-0000-17-040-L01-P&T | Activity Type: Knowledge | Disclosure: None
Friday, June 2, 8:00 am - 9:30am | 1.5 hr. | Room: Kidd/North Cape
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:
• Assess patient risk for developing recurrent VTE or stroke and apply guideline recommendations to determine a therapeutic plan
• Apply guideline recommendations to develop a therapeutic plan based on individual patient factors
• Review recent guidelines regarding stroke and VTE prevention

This presentation will provide an overview of newer guidelines for prevention of stroke and venous thromboembolism, review available anticoagulant therapies, and utilize case presentations for application.

Diabetes in an Aging Population and 2017 Updates
Speakers: Melanie Shelden, Pharm.D., Resident Pharmacist, WSU College of Pharmacy
ACPE # 0130-0000-17-041-L01-P&T | Activity Type: Knowledge | Disclosure: None
Friday, June 2, 8:00 AM - 9:30 AM | 1.5 hr. | Room: Casco
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist will be able to:
• Identify specific goals regarding diabetes management in the elderly population
• Discuss key concerns and risks in the elderly for certain medications used to treat diabetes
• Apply the principals covered from the 2017 ADA guidelines to patient cases

At the completion of this program, the technician will be able to:
• Identify specific goals regarding diabetes management in the elderly population
• Discuss key concerns and risks in the elderly for certain medications used to treat diabetes
• Identify key principles of the 2017 ADA guidelines

The is CE will have case-based discussion of 2017 ADA updates and specific goals and concerns in treating the elderly patient with diabetes.

Preceptor Self-Assessment: Jump Start Continuing Professional Development (CPD)
Faculty: Anita Cleven, Pharm.D., Director of Experiential Education, Assistant Professor, Pacific University School of Pharmacy, Jennifer Chang, Pharm.D., BCPS, Director of Preceptor Development, Clinical Assistant Professor, University of Washington School of Pharmacy, Tracy Pettinger, Pharm.D., Assistant Dean for Experiential Education; Clinical Associate Professor, Idaho State University
ACPE # 0130-0000-17-042-L04-P | Activity Type: Application | Disclosure: None
Friday, June 2, 9:40 AM - 11:10 AM | 1.5 hr. | Room: Boardroom 5
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Students
At the completion of this program, the pharmacist will be able to:

- Discuss the need to improve how pharmacy professionals approach their continuing education and lifelong learning
- List and describe the components of Continuing Professional Development (CPD)
- Describe the value and process of self-assessment
- Identify challenges and opportunities of integrating students into practice
- Design a CPD plan for a unique Precepting challenge based on information from the self-assessment

This program is designed to introduce preceptors to a new approach in continuing education and professional development. Preceptors will learn the importance and process of effective self-assessment and develop a plan for change.

**Pediatric Respiratory Infections**

Faculty: Brenda Kelly, Pharm.D., BCPS, Residency Program Director, Virginia Mason Memorial Hospital  
ACPE # 0130-0000-17-043-L01-P&T | Activity Type: Knowledge | Disclosure: None  
Friday, June 2, 9:40 AM - 11:10 AM | 1.5 hr. | Room: Kidd/North Cape  
Target Audience: Community, Ambulatory, Health Systems, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist will be able to:

- Differentiate clinical presentation of pneumonia, bronchiolitis and croup in pediatric patients
- Explain how pharmacokinetic/pharmacodynamic differences affect antibiotic dosing in pneumonia versus otitis media
- Describe appropriate and inappropriate treatment strategies for bronchiolitis

At the completion of this program, the technician will be able to:

- Differentiate clinical presentation of pneumonia, bronchiolitis and croup in pediatric patients
- Discuss the differences in antibiotic dosing for pneumonia versus otitis media
- Describe appropriate and inappropriate treatment strategies for bronchiolitis

This CE will review evidence-based treatment strategies for pediatric pneumonia, bronchiolitis/RSV, croup, and acute otitis media. Brenda will focus on key clinical interventions for pharmacists, both inpatient and community, and unique drug distribution pearls.

**Ambulatory Practice Forum**

Moderator: Andrea Corona, Pharm.D., BCACP, CDE, Director, PGY2 Ambulatory Care Pharmacy Residency Faculty Pharmacist, St. Peter Family Medicine Residency Program  
ACPE # 0130-0000-17-044-L04-P&T | Activity Type: Knowledge | Disclosure: None  
Friday, June 2, 9:40 AM – 11:10 AM | 1.5 hr. | Room: Casco  
Target Audience: Ambulatory, Community, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:

- Evaluate current trends in pharmacy practice
- Propose and discuss specific issues and needs pertaining to your practice setting
- Update peers on state and federal legislative/regulatory issues pertaining to pharmacy

This CE activity is designed to target the needs of pharmacists, technicians and interns working in Community Practice pharmacy settings. We will discuss the current issues affecting pharmacy practice in general throughout the Pacific Northwest as well as how these issues relate to this practice setting. Participants will be encouraged to contribute their thoughts in this interactive program.

**What’s New: Hot Topics in Inpatient Internal Medicine**

Faculty: Emmeline Tran, Pharm.D., BCPS, Clinical Assistant Professor, Washington State University  
ACPE # 0130-0000-17-045-L01-P&T | Activity Type: Application | Disclosure: None  
Friday, June 2, 12:50 PM – 2:20 PM | 1.5 hr. | Room: Boardroom 5  
Target Audience: Health Systems, Technician, Students

At the completion of this program, the pharmacist will be able to:

- Identify and evaluate recent literature pertinent to the practice of internal medicine
- Compare and contrast latest literature findings with current standards of care
- Integrate recent evidence-based recommendations into clinical practice
At the completion of this program, the technician will be able to:

- Identify medications examined in recent literature pertinent to the practice of internal medicine
- Distinguish between latest literature findings with current standards of care
- Integrate recent evidence-based recommendations into clinical practice

Recent literature pertinent to the practice of inpatient internal medicine will be discussed and compared with current standards of care. Moreover, integration of recent evidence-based recommendations will be examined in the context of clinical practice.

**Getting Started with Collaborative Agreements and National Trends in Pharmacist Prescribing**

Faculty: Krystalyn Weaver, Pharm.D., VP, Policy & Operations, NASPA
ACPE # 0130-0000-17-046-L03-P&T | Activity Type: Knowledge | Disclosure: None
Friday, June 2, 12:50 PM - 2:20 PM | 1.5 hr. | Room: Kidd/North Cape
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:

- Define collaborative practice agreements (CPA) and identify their role in providing team-based care.
- Explain approaches for developing a trusting relationship with another healthcare professional that may lead to the development of a CPA.
- Identify resources available for pharmacists looking to establish a CPA.
- Discuss the current models of pharmacist prescriptive authority across the United States.
- Identify key features of CPA authority in Washington, Montana, Idaho, Alaska, and Oregon.

Interested in using a collaborative agreement in your pharmacy but don’t know how to get started? This session will provide some jump-start information and guide you to other resources available from the CDC and others. You will also learn about trends in collaborative practice agreements and other methods of allowing pharmacists to prescribe states are using across the country.

**Long Term Care Forum**

Moderator: Steve Boulanger, R.Ph., FASCP, Consultant Pharmacist, Mercury Pharmacy Services
Faculty: Steve Singer, R.Ph., Pharmacist, Bellegrove Pharmacy and Grant Walker, Pharm.D., Pharmacist and Consultant, Mercury Pharmacy Services, Inc.
ACPE # 0130-0000-17-047-L04-P&T | Activity Type: Knowledge | Conflict of Interest: None
Friday June 2, 12:50 PM - 2:20 PM | 1.5 hr. | Room: Casco
Target Audience: Long Term Care Pharmacists, Technicians, Student Pharmacists

At the completion of this program, the pharmacist and technician will be able to:

- Evaluate current trends in pharmacy practice
- Propose and discuss specific issues and needs pertaining to your practice setting
- Update on state and federal legislative/regulatory issues pertaining to pharmacy
- Discuss strategies to reinforce more patient-centric mission for your profession

This CE program is designed to target the needs of pharmacists, technicians, and interns working in Long Term Care pharmacy settings. We will discuss the current issues affecting pharmacy practice in general throughout Washington State as well as how these issues relate to this practice setting. There will be updates on ASCP, Legislative Issues and Geriatric Care. Participants will be encouraged to contribute their thoughts in this interactive program. Steve Singer will discuss an innovative approach to hospice care and Pharmacy and Grant Walker will discuss antibiotic stewardship in the LTC setting.

**Managing Persistent Pain During an Opioid Epidemic: How Ambulatory Pharmacists Can Play a Role**

Faculty: Amanda Locke, Pharm.D., BCACP, Ambulatory Pharmacy Manager, Virginia Mason Medical Center
ACPE # 0130-0000-17-048-L01-P&T | Activity Type: Knowledge | Disclosure: None
Friday, June 2, 2:30 PM - 4:00 PM | 1.5 hr. | Room: Boardroom 5
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:

- Describe two types of collaborative practice models involving pharmacists in the management of persistent pain- one in primary care and one in a pain clinic
- Review training for pharmacists to assist in the management of persistent pain and opioid medication
- Identify opportunities across the continuum of care where pharmacists can contribute to management of persistent pain
- Discuss the barriers healthcare teams face when providing care to patients with persisted pain and on chronic opioid therapy
To understand how clinical pharmacist can be integrated into the management of patients with persistent pain on chronic opioid therapy by reviewing the learnings from an integrated health care system that has effectively trained pharmacists to care for these patients in primary care and a pain clinic.

Community Practice Forum
Moderator: Steve Singer, R.Ph., Pharmacist, Bellegrove Pharmacy
ACPE # 0130-0000-17-049-L04-P&T | Activity Type: Knowledge | Conflict of Interest: None
Friday, June 2, 2:30 PM - 4:00 PM | 1.5 hr. | Room: Kidd/North Cape
Target Audience: Community, Ambulatory, Pharmacist, Technicians, Students

At the completion of this program, the pharmacist and technician will be able to:

- Evaluate current trends in pharmacy practice
- Propose and discuss specific issues and needs pertaining to your practice setting
- Update peers on state and federal legislative/regulatory issues pertaining to pharmacy
- Discuss strategies to reinforce a more patient-centric mission for your profession

This CE activity is designed to target the needs of pharmacists, technicians and interns working in Ambulatory/Community Practice pharmacy settings. We will discuss the current issues affecting pharmacy practice in general throughout the Pacific Northwest as well as how these issues relate to this practice setting. Participants will be encouraged to contribute their thoughts in this interactive program.

Ethics for Healthcare Professionals: A Review & Discussion of Principles & Practice
Faculty: Christopher Owens, Pharm.D., MPH, Associate Professor and Chair, Department of Pharmacy Practice and Administrative Sciences, ISU College of Pharmacy
ACPE # 0130-0000-17-050-L03-P&T | Activity Type: Application | Disclosure: None
Friday, June 2, 2:30 PM - 4:00 PM | 1.5 hr. | Room: Casco
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:

- Describe the professional responsibilities of pharmacists when making ethical decisions, including the role of intuition, reasoning, and use of codes of ethics
- Compare and contrast key moral intuitions and associated bioethical principles related to the practice of pharmacy, including nonmaleficence, beneficence, respect for autonomy, justice, veracity, confidentiality, and fidelity
- Apply an ethical decision-making process to a variety of contemporary practice and regulatory issues facing the profession of pharmacy and analyze the differing moral intuitions and bioethical principles that can be used to justify competing points of view

This presentation will introduce basic concepts in bioethics and provide an opportunity for discussing important ethical issues with fellow participants, including controversial topics related to the practice of pharmacy. Participants will become familiar with key bioethical principles as well as their own ethical intuitions through an interactive process of self-reflection and audience participation. By the conclusion of the presentation, participants will be able to apply a systematic process to ethical decision-making and be able to discuss different aspects of a variety of issues in pharmacy practice, including professional responsibility, conscientious objection, and other controversial topics.

Saturday, June 3, 2017

Keynote: Embrace Uncertainty because Chaos is Freedom
Faculty: Spencer Marona, Co-Founder, Chaos Advantage
ACPE # 0130-0000-17-051-L04-P&T | Activity Type: Knowledge | Disclosure: Co-Founder of Chaos Advantage
Saturday, June 3, 8:00 AM -9:00 AM | 1.0 hr | Room: Bay 4&5
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:

- Identify the 6 “Cs” of chaos and champion curiosity
- Transform themselves to expect the unexpected
- Eliminate complacency through adaptability

The main theme of the speech will be focusing on the 6Cs of Chaos. The 6Cs will be aligned with current challenges and concerns that pharmaceutical industry is facing.
Hypertension Management: Mobilizing and Engaging Patients
Faculty: Kimberly McKeirnan, Pharm.D., Clinical Assistant Professor, Washington State University, Kyle Frazier, Pharm.D., Resident, Washington State University
ACPE # 0130-0000-17-052-L01-P&T | Activity Type: Application | Disclosure: Kimberly - Salary: WSU, Consulting/Speaking: UW, Grant/Research – Empire Health Foundation, Albertsons LLC, Pfizer Independent Grants for Learning and Change. Kyle-None
Saturday, June 3, 9:10 AM -10:40 AM | 1.5 hr. | Room: Bay 1
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist will be able to:
- Identify factors that may affect blood pressure readings
- Discuss current hypertension guidelines and literature
- Select appropriate hypertension management therapy
- Discuss ways to mobilize and encourage patients to meet HTN goals
- Demonstrate appropriate technique when taking a blood pressure reading

At the completion of this program, the technician will be able to:
- Identify factors that may affect blood pressure readings
- Discuss current hypertension guidelines and literature
- Discuss ways to mobilize and encourage patients to meet HTN goals

Discussion about hypertension management. Updates on guidelines, discussion of cases, demonstration of how to use manual blood pressure cuffs.

Suicide Prevention Training for Pharmacy Professionals
Faculty: Jennifer Stuber, Ph.D., Associate Professor, UW School of Social Work, Faculty Director, Forefront: Innovations in Suicide Prevention and Brandy Singer, Pharm.D., BCPP, Clinical Pharmacist, Eastern State Hospital
ACPE # 0130-0000-17-053-L05-P&T | Activity Type: Knowledge | Disclosure: None
Saturday, June 3, 2017, 9:10 AM -12:20 PM | 3 hrs. | Room: Bay 2
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:
- Recognize suicide’s impact in communities
- Describe pharmacy professional’s role in suicide prevention
- Education all patients to make home safer
- Prevent suicide professionally and personally using the LEARN steps.

This three hour comprehensive training will provide pharmacists with tools to identify people at risk of suicide and intervene to prevent suicide. Drs. Stuber and Singer will use their comprehensive knowledge of suicide and psychiatric illnesses to simplify suicide prevention into something every pharmacy professional can do. This training is intended to fulfil the 3 hour training required of Washington State licensed pharmacists, but is applicable to all pharmacy professionals.

Student Forum
No CE offered for this activity
Moderator: Jenny Arnold, Pharm.D., BCPS
Friday, June 3, 9:10 AM -10:40 AM | 1.5 hr | Room: Bay 3
Target Audience: Students, pharmacists and technicians

Financial Advisors Connor Black and Dustin Dhanani from Pacific Capital Resource Group will discuss financial issues pertinent to a new pharmacist practitioner including loan repayment, retirement savings, and planning for a big purchase. The Forum will end with an icebreaker activity that will help you get to know other students at the Convention. While there is no CE for this Forum, students, pharmacists and technicians are invited to attend. This Student Forum includes breakfast sponsored by Pacific Capital Resource Group.
FAQs on OTCs and Pets
Faculty: Cris DuVall, BA, MS, Pharm.D., Pharmacist, Rite-Aid
ACPE # 0130-0000-17-054-L05-P&T | Activity Type: Knowledge | Disclosure: None
Saturday, June 3, 9:10 AM -10:40 AM | 1.5 hr. | Room: Casco
Target Audience: Community, Ambulatory, Independent Pharmacist; Technician, Student

At the completion of this program, the pharmacist and technician will be able to:

- List OTC drugs safe for pets
- Identify OTC drugs harmful to pets
- Describe strategies for accidental exposure of pets to toxic doses

Nearly 1/5 of calls to the ASPCA’s Animal Poison Control Center are from owners whose pets got into medicines intended for human use, putting this category at the top of the toxin list. Learn how to save our furry, feathered and scaly friends in this engaging presentation delivered in a game show format.

Heart Failure: Refreshers and Updates
Faculty: Tracy Pettinger, Pharm.D., Assistant Dean for Experiential Education; Clinical Associate Professor, Idaho State University
ACPE # 0130-0000-17-055-L01-P&T | Activity Type: Knowledge | Disclosure: None
Saturday, June 3, 10:50 AM -12:20 PM | 1.5 hr. | Room: Bay 1
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist will be able to:

- Explain the complexity of the pathophysiology of CHF including compensatory mechanisms
- Review the New York Heart Association (NYHA) and American College of Cardiology (ACC) Classification of CHF
- Recognize the drugs used and describe their appropriate role in treatment of heart failure with reduced ejection fraction (HFrEF)
- Discuss new drug options available to treat HFrEF

At the completion of this program, the technician will be able to:

- Recognize the difference between HFrEF and HFpEF
- Review the New York Heart Association (NYHA) and American College of Cardiology (ACC) Classification of CHF
- Identify the classes of medications used in the treatment of HFrEF

Heart failure is a complex and often confusing disease state. During this presentation, the pathophysiology and treatment of patients with heart failure with reduced ejection fraction will be reviewed, along with newly approved drug therapies. Appropriate monitoring and patient education points will also be discussed.

Hospital Infectious Disease Hot Topics
Faculty: Briana Wenke, Pharm.D., Pharmacist, St. Francis Hospital
ACPE # 0130-0000-17-056-L01-P | Activity Type: Knowledge | Disclosure: None
Saturday, June 3, 10:50 AM -12:20 PM | 1.5 hr. | Room: Bay 3
Target Audience: Health Systems, Students

At the completion of this program, the pharmacist will be able to:

- Select appropriate antibiotic therapy for hospital acquired pneumonia based on the updated IDSA Guidelines
- Explain how procalcitonin can be used to de-escalate and limit duration of antibiotic therapy for select disease states
- Describe treatment principles for Clostridium difficile based on patient characteristics

An update on current topics in hospital based infectious disease, including the new HAP guidelines, procalcitonin and clostridium difficile.

Technician Forum: Advancing Pharmacy Practice: Pharmacy Technicians Administering Immunizations
Moderators: Bridgett Edgar, CPhT, Technician, Vice-President, Pharm-A-Save, Monroe and Dianna Fish, CPhT, Technician, Pharmacy Recruiter, Fred Meyer
Faculty: Kimberly McKeirnan, Pharm.D., Clinical Assistant Professor, Washington State University, Kyle Frazier, Pharm.D., Resident, Washington State University, Taylor Bertsch, Pharm.D., Academic Fellow, Washington State University
ACPE # 0130-0000-17-057-L01-P&T | Activity Type: Knowledge | Disclosure: Kimberly - Salary: WSU, Consulting/Speaking:
At the completion of this program, the pharmacist and technician will be able to:

- Describe the Idaho legislation change allowing pharmacy technicians to administer immunizations
- Explain the requirements of a training program developed to comply with the new legislation
- Discuss the pilot Idaho technician immunization training program and the results

Vaccines are a low cost, high impact intervention to reduce the rate of infectious disease. While it is known that pharmacists improve vaccination rates through immunization administration, incorporating immunizations into pharmacy workflow can be challenging. Due to new legislature in the State of Idaho, utilizing pharmacy technicians is now a solution to this problem.

An ACPE-accredited training program was developed to train pharmacy technicians to administer immunizations. The training program was provided to 25 certified pharmacy technicians in Idaho during December 2016. Immunization administration began immediately upon certification and the number of immunizations administered was collected.

Pharmacy technicians were integrated into pharmacy workflow and began providing immunizations immediately after completing the training program. Utilizing technicians to administer immunizations may positively influence immunization rates and reduce the spread of vaccine-preventable diseases.

**Credentialing and Privileging: New Pharmacy Musts**

Faculty: Jeff Rochon, Pharm.D., Chief Executive Officer, WSPA

ACPE # 0130-0000-17-058-P&T | Activity Type: Knowledge | Disclosure: None

Saturday, June 3, 1:30 PM - 3:00 PM | 1.5 hr. | Room: Bay 1

Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:

- Define credentialing and privileging.
- Explain the benefits of credentialing and privileging programs to advancement of pharmacists’ patient care service delivery.
- Describe examples of pharmacist credentialing and privileging programs in the marketplace.
- Develop credentialing processes for pharmacists at your site.

Credentialing and Privileging are essential steps for preparing your practice to bill as medical providers. As Washington implements pharmacists billing medical insurance for care, pharmacy leaders wished they knew about this important step they could have started years before the law was changed in their institutions. This session will also discuss credentialing and privileging standards, previously aimed at physicians, nurse practitioners and other providers that are being applied to pharmacists.

**From Sickest to Success: The Changing Paradigm of Antipsychotics in Recovery**

Faculty: Brandy Singer, Pharm.D., BCPP, Clinical Pharmacist, Eastern State Hospital, and Steve Einhaus, Peer Specialist, Eastern State Hospital

ACPE # 0130-0000-17-059-L01-P&T | Activity Type: Knowledge | Disclosure: None

Saturday, June 3, 1:30 PM - 3:00 PM | 1.5 hr. | Room: Bay 2

Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and will be able to:

- Describe the major advances in psychiatric pharmacotherapy practice over the past 50 years in relation to current practice and innovations.
- Apply at least one new idea into your practice that supports recovery and reduces stigma in caring for persons with mental illness.
- Assess use of medications for a person with mental illness that best promotes appropriate and optimal use and adherence.
- Recognize and effectively manage common drug interactions associated with the treatment of psychiatric disorders

At the completion of this program, the technician and will be able to:

- List three (3) ways to reduce stigma in your practice regarding persons with mental illness.
- Assist persons with mental health medications reduce gaps in treatment and navigate issues with obtaining prescription
Identify resources in assisting persons with mental health medications choose the optimal method for maintaining medication therapy.

Treatment for serious mental illnesses has come a long way from the days of lobotomies and life-long institutionalization in asylums. Although many people with mental illness still face discrimination, stereotyping and social stigma today. To better understand today’s treatment options, it is helpful to understand its evolution. We can benefit viewing from the perspective of those who have experienced mental health therapies. This session will explore the past, present and possible future of mental health treatment. Pharmacists and technicians will enhance their clinical knowledge that can be directly applied to the people they serve.

**Independent Pharmacy Forum: Profit Ignitor**
Moderators: Erik Nelson, Pharm.D., Owner, Sixth-Avenue Pharmacy
Speaker: Lisa Faast, Pharm.D., VP Marketing, Pharmacy Development Services
ACPE # 0130-0000-17-060-L04-P&T | Activity Type: Knowledge | Disclosure: None
Saturday, June 3, 1:30 PM - 3:00 PM | 1.5 hr. | Room: Bay 3
Target Audience: Independent Pharmacists, Technicians, Students

At the completion of this program, the pharmacist and technician will be able to:
- List the top 2 KPIs you should track in your pharmacy business
- Discuss the 5 strategies to increase profits through dispensing
  1. Therapeutic substitution
  2. Dosage form substitution
  3. Fill profitable Rxs more often
  4. Fill more variety of high profit Rxs
  5. Mitigate exposure to low margin prescriptions

**Health Systems Forum**
Moderator: Christopher Greer, R.Ph., Pharmacy Manager, St. Luke's Rehabilitation
ACPE # 0130-0000-17-061-L04-P&T | Activity Type: Knowledge | Disclosure: None
Saturday, June 3, 1:30 PM - 3:00 PM | 1.5 hr. | Room: Casco
Target Audience: Health Systems, Pharmacists, Technicians, Students

At the completion of this program, the pharmacist and technician will be able to:
- Discuss current trends in pharmacy practice
- Propose and discuss specific issues and needs pertaining to health system practices
- Update peers on state and federal legislative/regulatory issues pertaining to pharmacy

This CE program is designed to target the needs of pharmacists, technicians and interns working in Health System pharmacy settings. We will discuss the current issues affecting local pharmacy practice in general as well as how these issues relate to this practice setting. Participants will be encouraged to contribute their thoughts in this interactive program.

**Current Issues in Pharmacy Practice: Montana**
Faculty: Stuart Doggett, Executive Director, Montana Pharmacy Association
ACPE # 0130-0000-17-062-L04-P&T | Activity Type: Knowledge | Disclosure: None
Saturday, June 3, 3:00 PM - 4:30 PM | 1.5 hr. | Room: Bay 1
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:
- Discuss pharmacy legislation considered and passed at the 2017 Montana Legislative Session
- Update peers on Board of Pharmacy rule changes including the Drug Registry Program
- Update peers on state and federal policies changes impacting pharmacist

Montana pharmacists are urged to attend the Montana member meeting for updates on state and federal issues.

**Current Issues in Pharmacy Practice: Washington**
Faculty: Jeff Rochon, Pharm.D., Chief Executive Officer, Washington State Pharmacy Association and Kirk Heinz, R.Ph., Owner, Kirk’s Pharmacies
ACPE # 0130-0000-17-063-L04-P&T | Activity Type: Knowledge | Disclosure: None
Saturday, June 3, 3:00 PM - 4:30 PM | 1.5 hr. | Room: Bay 2
At the completion of this program, the pharmacist and technician will be able to:

- Discuss state and federal legislative/regulatory issues pertaining to pharmacy practice in Washington State
- Describe current positive and negative trends in pharmacy practice
- Describe the priorities of the Washington State Pharmacy Association

This program is designed to educate members on the current events pertaining to the Washington State practice of pharmacy in the last year and near future. Members are encouraged to voice their opinions and hear those of others in this interactive session.

**Current Issues in Pharmacy Practice: Idaho**
Faculty: Pam Eaton, Executive Director, Idaho State Pharmacy Association
ACPE # 0130-0000-17-064-L04-P&T | Activity Type: Knowledge | Disclosure: None
Saturday, June 3, 3:00 PM - 4:30 PM | 1.5 hr. | Room: Bay 3
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:

- Update members on current pharmacy issues in Idaho and at the national level
- Update members on the Idaho State Pharmacy Association’s activities over the past year
- Plan for the future, particularly the next 12 months of the Association

This program is designed to educate members on the importance of the Idaho State Association and how it impacts every day operations as well as the profession as a whole. Members will walk away from this meeting with an understanding of current issues facing pharmacy in Idaho and how they can become actively involved in shaping the practice of pharmacy on a state level.

**Sunday, June 4, 2017**

**Opioid Safety and Risk Reduction**
Faculty: Jessica Lancaster, Pharm.D., BCACP, Academic Detailing Clinical Pharmacy Specialist, Department of Veteran’s Affairs VISN 20 Northwest Network
ACPE # 0130-0000-17-065-L03-P&T | Activity Type: Knowledge | Disclosure: None
Sunday, June 4, 8:00 AM - 9:30 AM | 1.5 hr. | Room: Bay 2
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist will be able to:

- Identify and discuss various methods of opioid risk mitigation
- Develop a taper plan for patients on high dose opioids
- Identify alternative treatment modalities for treatment of chronic pain
- Interpret and apply urine drug screen results to clinical practice
- Integrate use of/recommendation of naloxone into clinical practice as an opioid risk reduction tool and public health service

At the completion of this program, the technician will be able to:

- Identify and discuss various methods of opioid risk mitigation
- Describe key features of a taper plan for patients on high dose opioids
- Identify alternative treatment modalities for treatment of chronic pain
- Describe how urine drug screen results can impact prescribing
- Relate how naloxone can be used to reduce opioid risk and help public health

**Montana Law Update**
Faculty: Marcie Bough, Pharm.D., Executive Officer, Montana Board of Pharmacy
ACPE# 0130-0000-17-066-L03-P&T | Activity Type: Knowledge | Disclosure: None
Sunday, June 4, 8:00 AM - 9:30 AM | 1.5 hr. | Room: Bay 3
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:

- Describe law and regulatory updates related to the Montana Board of Pharmacy and the 2017 Legislative Session
- Discuss Montana Prescription Drug Registry (MPDR) program activities
- Discuss future activity related to sterile compounding

This program will review updates to Montana pharmacy statutes and rules.
Using a Virus to Fight a Virus: Gene Therapy for HIV / AIDS Using Foamy Virus
Faculty: Grant Trobridge, Ph.D., Associate Professor, Washington State University
ACPE # 0130-0000-17-067-L02-P&T | Activity Type: Knowledge | Disclosure: Consulting, Speaking & Teaching: GLG- Gerson Lehrman Group
Sunday, June 4, 9:40 AM -11:10 AM | 1.5 hr. | Room: Bay 2
Target Audience: Health Systems, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:
• Describe stem cell gene therapy approach for blood diseases
• List viral vector systems used for hematopoietic stem cell gene therapy
• Explain what genotoxicity is in the context of viral vector gene therapy
• Describe how a viral vector system can be modified to reduce genotoxicity
• Discuss critically the promise and challenges of using stem cell gene therapy to treat HIV / AIDS

Presentation of stem cell gene therapy approach for HIV / AIDS

Idaho Law Update
Faculty: Alex Adams, Pharm.D., MPH., Executive Director, Idaho State Board of Pharmacy
ACPE # 0130-0000-17-068-L03-P&T | Activity Type: Knowledge | Disclosure: None
Sunday, June 4, 9:40 AM -11:10 AM | 1.5 hr. | Room: Bay 3
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent, Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:
• Describe the 2017 statutory changes impacting the pharmacy profession in Idaho
• Describe the 2017 rules changes impacting pharmacy practice in Idaho
• Describe potential law changes for 2018 and beyond

The Idaho Pharmacy Law update will satisfy Idaho State Board of Pharmacy rule # 052.02, which requires annually one clock hour (0.1 CEU) of Board of Pharmacy approved jurisprudence programs. Attendees will gain an understanding of current regulatory issues including recent statute and rules changes.

Point-of-Care Testing: An Opportunity to Provide Patient-Centered and Collaborative Care
Faculty: John T. Holmes, Pharm.D., BCPS, Assistant Research Professor of Family Medicine and Pharmacy Practice, Idaho State University
ACPE # 0130-0000-17-069-L04-P&T | Activity Type: Application | Disclosure: None
Sunday, June 4, 11:20 AM -12:50 PM | 1.5 hr. | Room: Bay 2
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist will be able to:
• Examine the risks and benefits of implementing a community pharmacy-based POCT program from the patient, provider and payer perspectives
• Utilize previously implemented community pharmacy-based POCT programs to gain institutional support for dissemination of a POCT program in your practice
• Design and implement an evidence-based POCT program in your practice setting

At the completion of this program, the technician will be able to:
• Differentiate point-of-care testing from other forms of laboratory testing
• Utilize previously implemented community pharmacy based POCT programs to gain institutional support for dissemination of a POCT program in your practice
• Design and implement an evidence-based POCT program in your practice setting

This presentation will provide an overview of pharmacy-based point-of-care testing (POCT) and introduce participants to basic concepts of collaborative POCT program development and implementation.

Washington Law Update
Faculty: Steven Saxe, R.Ph., FACHE, Executive Director, Pharmacy Quality Assurance Commission, Washington State Department of Health
ACPE#: 0130-0000-17-070-L03-P&T | Activity Type: Knowledge | Disclosure: None
Sunday, June 4, 11:20 AM -12:50 PM | 1.5 hr. | Room: Bay 3
Target Audience: Community, Ambulatory, Health Systems, Long Term Care, Independent Pharmacist, Technician, Students

At the completion of this program, the pharmacist and technician will be able to:

- Describe how to apply new laws and rules to pharmacy practice
- State how to put patient safety and pharmacy care first while adhering to pharmacy law
- Identify the Commission’s agenda for new and updated areas of practice regulation
- Recall the pharmacy practitioners’ responsibilities for new and updated regulations

This program will discuss application of new laws and regulations. Topics will include new state requirements for licensure, handling of hazardous drugs, practices requiring commission approval, adverse event reporting, compounding and more.

Meeting Information

The Washington State Pharmacy Association is accredited by the Accreditation Council for Pharmacy Education as a Provider of continuing pharmacy education

CE Information

The activity description will have an ACPE number which will indicate if the activity is accredited for pharmacists, technicians or both. If the activity has only a P at the end of the number it is only accredited for pharmacists, and technicians will not receive credit. If it has only a T it is only accredited for technicians, and pharmacists will not be able to receive credit. If it has a P&T then it is accredited for both pharmacists and technicians.

CE Requirement – Secret Codes and Online Evaluation

At the end of each CE presentation, you will be provided with a secret code. There will be two different codes – one for pharmacists and one for technicians. The secret codes provided should be entered as all lower-case letters, as the system is case-sensitive. To receive credit for the activity, you will need to follow the Live Event CE Upload Instructions (found in your packet) then go on-line to the WSPA Education Portal and submit your secret codes plus evaluation for each CE program you attend. A few days after completing the upload you should confirm that they are all showing in your CPE Monitor. We will have staff and computers available during the convention to assist you with the upload. Please feel free to ask a WSPA staff member for assistance.

In order to process your CE credits, you must provide your correct NABP e-Profile ID number and your birth month and day (MMDD format). The NABP e-Profile ID number is a six to eight-digit number, and it is NOT your license number, NPI number, or store NABP#. If you need to verify your number or have not yet registered for one, please visit www.MyCPEMonitor.net. You will only have 60 days to upload your CE credits from the convention date. ACPE will not allow any uploads after the 60 days, so any issues will need to be resolved before then.

Technician or Pharmacist Accredited CE

The CPE programs accredited for pharmacists will have a designation of “P” next to the ACPE number. CPE activities accredited for technicians will have a “T”. For example, “ACPE # 130-000-17-045-L04 P&T” is accredited for both pharmacists and technicians.
